SPARTA GLOBAL FINANCE, RISK AND COMPLIANCE (FR&C) CAPABILITY DEVELOPMENT

Service Definition Document

About Sparta Global.

Sparta Global is a global technology services and education business that specialises in building digital, AI, and business capability for organisations across the public and private sectors. Our purpose is to close the technology skills gap by equipping organisations with the people, expertise, and intelligence required to thrive in a rapidly evolving digital landscape.

Through our award-winning Technology and AI institute, we develop AI-native digital professionals ready to excel in tech-driven environments and provide specialist training that enables organisations to build sustainable in-house capability. With more than a decade of cross-industry experience, Sparta Global combines credible business and technology training with flexible, cost-effective consultant delivery to help clients boost workforce capability, reduce hiring risk, and strengthen long-term talent pipelines.

We help public-sector bodies meet DDaT and GDS standards by modernising legacy systems, adopting and delivering secure digital products at pace, and building fast, auditable routes to capable teams to deliver citizen services securely and at scale.

Sparta Global Finance Risk & Compliance Capability Development

Sparta Global's Finance Risk & Compliance training has evolved for two main reasons; the success of the DevOps stream at Sparta has enabled us to understand how to produce engineers outside of the traditional development or testing space and get people ready for work in this specialised area, and the demand from our clients who need to put security at the centre of their technical teams.

By the end of training at the Sparta Institute, our Spartans will be able to fit the demand of any project and focus on delivering crucial value in the Security space needed by the client. During training, the individuals work on a broad spectrum of areas to help them focus on Finance Risk & Compliance as a role. It is crucial that everyone who comes through our course can understand and demonstrate ability to work in different team deliveries, using Scrum, Kanban, Agile and more, whilst also understanding differing systems a client may use. The core part of the course takes the trainees through Agile, Scrum, Windows, Linux, Scripting, Virtualisation, Networking, Databases and CI/CD. With these core competences, our trainees are enabled to push forward in a multitude of different areas with our clients to specialise further in their security needs. Spartans will be able to cover a variety of potential job roles including but not limited to Finance Risk & Compliance Engineers, Cloud Security Engineers, DevOps Security Engineers, DevSecOps Engineers or Penetration Test Engineers.

Sparta Global is developing AI Native consultants by embedding high-level capabilities and an AI-first mindset across all disciplines. Through specialised training and Innovation Labs, the Spartans leverage discipline-specific use cases to master the safe, effective deployment of Generative and Agentic AI in real-world environments.

Sparta Vanguard

Sparta Global Vanguard helps organisations turn AI ambition into real, measurable impact. Our Managed Delivery Pods are designed to accelerate high-impact programmes across data, AI, transformation, and cloud. Each pod brings together specialist expertise to tackle real business challenges, using innovative AI and emerging technologies to deliver results quickly and effectively.

We deploy consultants with over three years of industry experience (SFIA 3 and beyond) who integrate seamlessly into your teams, driving rapid capability building and effective knowledge transfer. Our consultants integrate seamlessly into existing teams, supporting rapid capability building and effective knowledge transfer while maintaining momentum on critical programmes.

Sparta Vanguard Pods provide high-quality, flexible delivery across sectors and business types, adapting to organisational needs while maintaining consistent delivery excellence. For organisations looking to explore innovation with reduced risk, our AI Proof of Concept Pods combine PhD- and MSc-level expertise with dedicated AI support, enabling rapid experimentation, validation, and the development of scalable solutions.

- Internal training faculty allows for rapid deployment of skills.
- Scalable programs support geographic levelling up.
- Consultants are unaffected by IR35 regulations.

Additional information.

Partnering

Training over 1,000 consultants each year, across a range of cloud-based specialisms, which align with the Government Digital and Data profession framework, customers will have readily available access to a resource pool to be used either as part of a strategy to develop permanent cloud-based capability. Or alternatively for short-term requirements for cloud projects.

Customers can on-board single or multiple Finance Risk & Compliance Spartans, on an instant demand basis. Alternatively, we will work with customers to provide a larger number of consultants (10+). Our Finance Risk & Compliance course can be amended, or rebuilt, based on the customer's cloud and technology environment – to ensure the correct skills are provided. Geographical and ED&I criteria can be set by the customer, to help with long term retention and align with capability development plans. This value-add and customer focused service is known as a Dedicated Programme, which is specific to Sparta Global's delivery as a Capability Development specialist.

Service Management

All engagements are agreed prior to commencement which includes the service definition, deliverables and relevant timelines.

The delivery of the service is managed by a dedicated Sparta Global Account Manager overseeing the project to ensure quality and continuity standards are maintained. The Account Manager will be the main point of call in arranging the project initiation, specific service requirements and matters of a commercial nature. Each Account Manager will have a nominated deputy in case of absence to ensure continuity of service.

Consultants will receive reviews monthly in the first year of their assignment with the Buyer. These reviews will be conducted by either the Account Manager or a member of Sparta Global's Engagement Team. Continued training and development is provided via access to e-Learning, industry accredited certifications, or access to our Academy Trainers - facilitated either by the Account Manager or a member of the Engagement Team.

Service Levels

All service levels are agreed prior to commencement of a project.

Orders and Invoicing

To order services please contact contact@spartaglobal.com. Once the order has been received you will be assigned a dedicated Account Manager who will be your key point of contact throughout the process.

Invoicing is based on the submission of monthly timesheets. Our standard invoicing terms are 30 days from start date of services.

On-boarding and Off-boarding Process

All resources on-boarded by Sparta Global will comply with the Baseline Personnel Security Standard (BPSS).

Sparta Global's recruitment process complies with the BPSS standard and involves the verification of identity; nationality, immigration status, employment history and criminal records of all resources. Sparta Global have extensive experience in providing verified CTC, SC and DV Cleared consultants for Government customers.

As part of the off-boarding process, resources will either come to an agreed end of contractual obligations or following a communication from the client in the agreed notice period that the project will be completed earlier. If the resource is transferred to permanent by the Buyer, Sparta Global can support with the Civil Service recruitment process.
