

## Pricing Information

This pricing document applies to all the services that Redesmere provides using the G-Cloud 15 framework.

### Published Rates

Our published rates represent the fees we charge for engagements performed using a Time & Materials charging model.

These rates have been calculated on the following basis:

- ▶▶ Our practitioners will work a standard professional day, where a professional day is defined as any eight hours worked, excluding any lunch break, between 8am and 6pm on any given working day.
- ▶▶ A working day is defined as Monday to Friday, excluding Bank and Public Holidays.
- ▶▶ Our charges are based on the assumption that our practitioners will perform the services from our offices or at a designated primary client site
- ▶▶ Out of pocket expenses incurred by our practitioners in respect of travel, accommodation and subsistence for work at locations other than a primary client site or from our offices will be recharged in accordance with the Client's expense policy.
- ▶▶ All fees quoted exclude VAT.

### Other Charging Models

The vast majority of our services are delivered using fixed-price, outcome-based charging models where our fees are directly linked to the value of the services we provide.

We are also happy to perform engagements using other charging models, including negotiated daily rates which are inclusive of time and expenses for work performed across multiple client sites and risk-reward contracts.
