

Agilio Flex/My Locum Manager

Product Description

Agilio Flex/My Locum Manager

Agilio Flex/My Locum Manager allows health care systems to build flexible staff pools to support all the practices in your area with staff scheduling, reduce time and costs, whilst building continuity of care for your patients and aiding staff retention. Once activated, practices and PCNs can create temporary staff pools and fill shifts with our smart matching technology. There is visibility on staff members that are available for instant booking and shifts can be sent out to staff pools that can be created on a practice, PCN, borough or ICS level bank. All credentials can be managed and stored on the system helping to support CQC compliance. Payroll administration is automated providing huge time saving benefits. MLM allows practices and PCNs to staff services with locum GP staff and allied health professionals. The platform has a strong emphasis on attracting and retaining staff. With its inbuilt retention tools and provision of support, CPD and time saving technology for self employed staff. Unlike other staffing platforms, our flexible pools solution also has the benefit that it will integrate with TeamNet (provided by Agilio Software Primary Care) and its existing HR and workforce modules, such as rotas, staff availability, HR card containing HR checks and key credentials, mandatory training, and more. This is a huge time saving benefit for practice managers, with no more admin and email responses to chase, and all the information at hand to build rotas, find cover when needed and remain compliant. When integrated with TeamNet it means that for CQC inspections, everything that is required can be found in one place, whenever it is needed.

Integrated

Source and book clinicians directly saving your Practice Managers time. With our TeamNet integration, benefit from all your HR information and workforce planning tools in one place.

Boost staff retention

Increase capacity with our community across every ICS. We support your flexible GP pool to feel an integral, valued member of a community.

Real-time

Access live local staff availability, fill shifts instantly. Easily view and assign face-to-face or digital sessions across sites to local GPs who are available to cover.

Grow

Create your own digital staff pool to make the most of your existing workforce, and cover gaps from our community of local GPs. MLM accommodates all staff types to help you widen your own pool of trusted clinicians.

Trusted

Over 3 million patients seen annually by our GP community, and a locum presence across every ICS footprint.

NHSE improved

A funded, NHSE approved, flexible staff pools provider.
