

Experian Data Governance Consultancy

Partnering to deliver trust in your data

Data governance is a key enabler of business success. Sitting at the heart of modern organisations, data serves as the fuel that drives thinking, planning and decision making. The ability to successfully manage your data estate is fundamental to innovation, collaboration and success; but with data volumes growing exponentially, data estates increasing in complexity and fragmentation, and consumers consistently demanding more, it can be daunting to tackle data governance.

Experian's expert consultants understand that well managed data unlocks opportunity and is key to delivering against business strategy, brand vision and company purpose. Data governance provides the framework that helps organisations harness their most valuable asset. If your business is looking to take its first steps into governance, transform an existing data governance programme or solve a data challenge, **we can help.**

Support regulatory compliance

Build trust in data

Prevent data issues generating unnecessary cost

Improve data literacy across the organisation

Drive process efficiency

Understand impact of data on process

Introducing Aperture Governance Studio

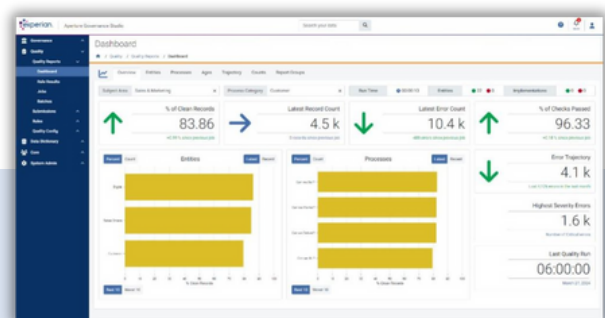

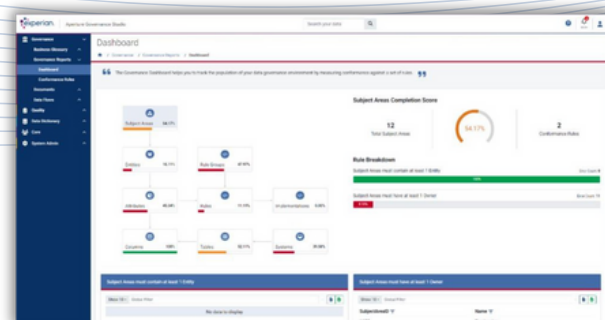

Our consultants work with Experian Aperture Governance Studio, a highly intuitive data governance solution that works across all sectors. Easy and fast to implement, it brings clarity and understanding to a data estate in days, not months, with a simple user-friendly interface that makes sense of data for users at all levels whether they are technically minded or not.

Supported by our consultants, the solution will help you find, track, understand and manage data across your business, building an accurate picture of what data assets you have, how data moves around and how it is used. Uncover hidden data challenges, identify the impact of data on business processes, produce reliable information, and anticipate and solve problems.

Drive business success with well managed and controlled data that you can trust.

Key features

- ✓ **Business Glossary:** set an agreed definition for all data items and build a glossary of key terms
- ✓ **Data Policies:** set and store all policies in a single go-to repository
- ✓ **Data Ownership:** see clear multi-level ownership of data across your business
- ✓ **Impact Analysis:** identify the impact of data quality on business processes

Why we're different...

Highly collaborative: we get to know you, your vision, your challenges and your data, so our work is aligned with and closely tailored to your business

Results focused: we'll help you identify where your data is holding you back, why, and how you solve this; and we'll help you design the structure and controls to maintain good standards

Industry experts: our consultants are recognised not just for their detailed subject matter expertise, but also for their flexibility, creativity and pragmatism

Scalable: whether you're solving one problem, or 100, our team will provide the structure and support you need to tackle challenges, and control and trust your data

Ready for a conversation? Our Data Governance experts are here to help
