

Active Directory Security Assessment

Microsoft Active Directory is the heart of the Enterprise network security model often targeted by threat actors to gain control of IT assets of an organisation. Whether in support accreditation, or to give peace of mind, an Active Directory review will identify deviations from best practice in this important asset.

Features

- Assessments conducted by CREST, Cyber Scheme and CHECK certified specialists
- Identifies deviations from best practice
- Enterprise network security assessment
- Assessment of network security model
- Highly experienced, SC and DV-cleared security specialists
- Team in operation for over 28 years
- Full reports, delivered securely, detailing vulnerabilities prioritised critical to low
- Provides real, actionable intelligence against security posture

Benefits

- Identifies how real-world attackers would compromise your organisation
- Experts provide evidence-based identification of organisational, critical business risks
- Provides a prioritised recommendation and guidance to fast-track remediation
- Assures effectiveness of technical controls and third-party investments

- Quickly increases organisational resilience by benchmarking against best practice
- Increases assurance through real, actionable intelligence against security posture
- Outstanding value for money from limited cyber security budgets
- Satisfies mandated and compliance requirements
- Optional supporting security services to assist clients where really needed
