

Phishing Attacks

Organisations recognise the importance of training, detecting and protecting against phishing attack vectors but have a hard time gauging how successful these measures are. QinetiQ's phishing service uses social engineering techniques and OSINT to craft tailored, realistic campaigns and provide telemetry on how resilient organisations are to this attack methodology.

- Features
- Targeted staff campaigns in a safe environment
- Assess an organisations security maturity from a human perspective
- Analysis of an organisation’s digital footprint via OSINT
- Manipulate staff into sharing sensitive information and passwords
- Threat actor and vector-based vishing and phishing
- Highly experienced, SC and DV-cleared specialists
- Team in operation for over 28 years
- Full reports, delivered securely, detailing vulnerabilities prioritised critical to low
- Benefits
- Educates staff to the risks of real phishing attacks
- Leads to targeted staff awareness training
- Identifies how real-world attackers would compromise your organisation
- Experts provide evidence-based identification of organisational, critical business risks

- Provides a prioritised recommendation and guidance to fast-track remediation
- Increases assurance through real, actionable intelligence against security posture
- Potential to increase global resilience
- Outstanding value for money from limited cyber security budgets
- Satisfies mandated and compliance requirements
- Optional supporting security services to assist clients where really needed
-
