

Build Reviews

A QinetiQ Cyber Security Service

Build reviews examine a server, workstation or laptop against one or more agreed best-practice templates.

Operating system patching, build configuration, and lockdown are examined, and application software installed on the system is reviewed to identity vulnerabilities or miss-configurations that could lead to a compromise of the security of the host. .

Features

- Assessments conducted by CREST, Cyber Scheme and CHECK certified specialists
- Operating system patching review
- Application software analysis including bespoke designs
- Build configuration reviews and assessments
- Vulnerability testing and identification of miss-configurations
- Identification of vulnerabilities, full penetration assessment
- Real time actionable intelligence, full security posture assessment
- Highly experienced, SC and DV-cleared security specialists
- Team in operation for over 28 years
- Full reports, delivered securely, detailing vulnerabilities prioritised critical to low
