Br...

Type	Guideline	Description
!	4.1.2 A	Each interactive element i.e. headings, labels should have an accessible name.
!	2.1.1 A	Images should have alt text, if the image is decorative it should be marked up accordingly.
!	2.4.1 A	You should be able to navigate using a keyboard only.

Accessibility Score

Our site has a rating of:

78%

Up 6% since your last scan

Visual information should also be represented in code form by using form labels or aria-describedby by i.e for hint text on an input field.

Content/components should not be referred to via colour, size, position shape only.

Every page should have a page title in the <title> attribute telling the user what that page has.

Accessibility Score

Your site has a rating of:

78%

Up 6% since your last scan

Online accessibility is a **continuous journey**, not a one-time fix.

Plan & Scan

Instantly scan your entire digital landscape to find hidden accessibility barriers, prioritise high-impact fixes, and set the foundation for inclusive user experiences.

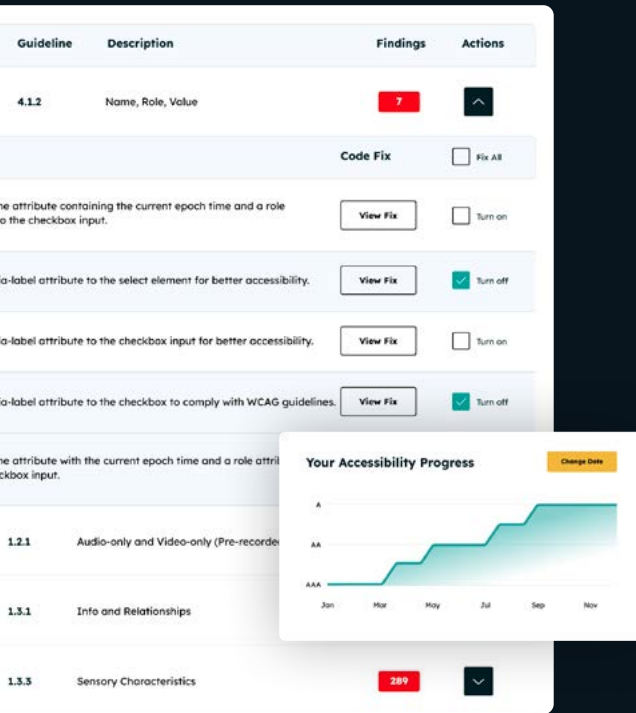

Fix & Improve

Empower every team to act fast with AI-driven fixes, dev-ready code, and smart editing tools that accelerate progress and reduce manual workload.

Maintain & Scale

Track improvements, prove compliance, and keep every new piece of content accessible automatically, consistently, and at scale.

OUR APPROACH

Scalable and Sustainable

We work in 12-week cycles to;

- **Plan:** analyse & prioritise your digital landscape
- **Scan & Audit:** chosen priority assets to remediate
- **Fix:** with SME guidance & our AI-powered Fix Library
- **Maintain:** through monitoring, training & documentation

This rhythm repeats, creating a sustainable program of WCAG conformance, built for lasting impact.
