Company overview

We're driven by technology and innovation, and by their ability to create meaningful change for organisations and the communities they serve. As a proudly independent and employee-owned consultancy, we bring together a diverse, highly skilled team who thrive on tackling complex challenges, working closely with our clients to deliver solutions that make a real difference.

We partner with organisations across multiple sectors, using data, AI and digital to help turn ambition into outcomes. Our work is recognised by leading industry bodies, reflecting our consistent focus on delivering clear, customer-centred results that stand up in the real world.

How we do it

With over 25 years of experience delivering digital transformation, Answer Digital supports organisations through complex change, with deep expertise in cloud-led delivery. We work in close partnership with our clients to innovate responsibly, embed best practice, and deliver outcomes that last.

Every engagement is different, so we build teams around the challenge, not a fixed model. We start by understanding the vision, the users, and the outcome that really matters. From there, we design solutions that fit your technology landscape, tools, roadmap and people.

Collaboration sits at the heart of how we work. We establish ways of working that are sustainable for teams, processes and practice, then iteratively design, build and test together. We continuously learn, refine and evolve, keeping a clear focus on delivering the right outcome, not just shipping technology.

Answers AI Orchestration & Intelligent Automation Platform

Service description

A secure SaaS platform for AI orchestration and intelligent automation across the public sector. It deploys, manages and governs AI agents, large language models and imaging solutions with integrated MLOps, monitoring and assurance. Supports ethical AI, Zero Trust security, data sovereignty, compliance and continuous performance evaluation at scale.

Features

- Orchestration of Agentic AI for autonomous, proactive workflow execution
- Intelligent automation with Human-in-the-loop validation for safety-critical outputs
- Built-in Explainable AI ensuring transparent, auditable decision-making
- Support for Federated Learning to train models protecting sensitive data
- Creation of Digital Twins for operational simulation and planning
- Specialised support for medical imaging and DICOM standard integration
- Architected on Zero Trust security principles for maximum data protection
- Automated MLOps pipelines for rapid, reliable model deployment
- Active post-market surveillance and continuous performance evaluation of models
- Real-time monitoring and drift detection for deployed AI agents

Benefits

- Accelerates transformation through scalable, autonomous Agentic AI capabilities
- Integrated FinOps monitoring to control and optimise cloud costs
- Ensures alignment with Ethical AI frameworks and government standards
- Mitigates operational risk through continuous post-market model surveillance
- Identifies optimal investments based on real-world performance data
- Safely integrates complex medical imaging AI into existing workflows
- Prevents vendor lock-in with a sector-agnostic open platform
- Reduces administrative burden through intelligent automation of routine tasks
- Ensures data sovereignty and compliance with strict security standards
- Enhances decision confidence with explainable, transparent model outputs

Pricing

Answer Digital services are available for procurement through either Fixed Price or Time & Materials arrangements. Please refer to our Pricing Document and Rate Card for further details.
