

OSPREY CYBER SECURITY PLATFORM

**CND's Osprey solution
collects and analyses
security events within your
vessel in real-time**

SERVICE OVERVIEW

Our Osprey Platform collects events from the essential devices of the vessel. CND's cyber security analysts become your eyes and ears, alerting you to arising threats in real-time.

To ensure the service remains affordable, many of the elements are optional, enabling you to only pay for the services you require. As your appetite for cyber grows more devices can be monitored, increasing your visibility.

DELIVERABLES

As an Osprey client, you receive:

1. Monitoring of the Boundary Firewall.
2. Monitoring of the Anti-Virus.
3. Intrusion Detection.
4. Weekly External Vulnerability scanning.
5. Weekly reports.

SERVICE DETAILS

The service will commence with a scoping call, where our team will explain Osprey and enable us to gain a better understanding of your requirements, such as options and sizing.

A physical appliance will be installed onboard your vessel to collect events from a variety of sources.

Within moments of deploying the sensor and configuring the event sources, Osprey will be operational and reporting security events.

PRICING

Pricing starts from just £993 per month, based on a 12-month subscription.

The Osprey appliance is an additional £200 per month for the rental.

INTERESTED?

Prior to establishing the service, you are invited to a high-level demo where we explain the elements.
