

CYBER ESSENTIALS & CYBER ESSENTIALS PLUS

Protecting your business from
approximately 80% of the
current cyber security threats.

SERVICE OVERVIEW

As a Cyber Essentials Certification Body for the UK Government backed scheme, CND is able to assess and issue Cyber Essentials (CE) and Cyber Essentials PLUS certifications.

Cyber Essentials is the basic level of certification. Using a Self-Assessment Questionnaire (SAQ), we verify if your responses comply with the standards.

Cyber Essentials PLUS: during an on-site visit, our assessors will conduct a number of scans, visual inspections, and test scenarios on a representative sample of your systems to ensure your organisation is actively meeting the CE PLUS standards.

DELIVERABLES

As a pass/fail test, the desired outcome is for the client to obtain their Cyber Essentials certification.

If required, there may be further guidance, remediation and reporting to achieve this.

SERVICE DETAILS

Our returning clients, or those who are IT experts, may opt to achieve their certification through a Self-Assessment Questionnaire (SAQ) with limited CND assistance. CND will assess the responses and issue a pass or fail.

If required, CND consultants can work with you through the SAQ completion (guided by CND experts). If your organisation does not meet the CE criteria, we will recommend a remediation plan to achieve compliance prior to SAQ submission. CND can also assist with any remediation under a separate arrangement.

To achieve the Cyber Essentials PLUS certification, our consultants will obtain a representative sample of your sites in order to audit your SAQ responses. We work with you to undertake much of the work remotely and to minimise the likelihood of issues on the day. The number of delivery days required will be determined in a scoping call prior to service commencement.

PRICING

Cyber Essentials

Company Size	Renewal / Pass	Assisted	Guided
Micro 0-9	£320	£650	£950
Small 10-49	£440	£850	£1,250
