

gauge it

Gauge your employee's morale using anonymous feedback.

Built for Microsoft Teams

What we offer

As businesses have transformed to adopt hybrid, flexible and remote working, it has become more difficult for Leaders to maintain a consistent feedback loop with all members of their team. Having access to regular, actionable insights from employees is essential to successfully navigate short and long term goals, ensuring any issues are identified and actioned early and avoiding problems in the long term.

By integrating seamlessly into the daily workflow of Microsoft Teams, Gauge it offers a user-friendly platform for employees to voice their feedback anonymously- encouraging a routine of regular, honest communication without fear of repercussions. The result? A de-stigmatised feedback loop, fostering a culture of continuous improvement, high team morale and increased productivity.

Empower your team with Gauge it and transform team feedback into a powerful tool for growth.

Introducing Flyte

Why Microsoft 365?

Save your company money

Microsoft 365 is available as a simply, monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

Scale your business quickly and flexibly

Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on up to five PCs/Macs and five mobile devices. Microsoft 365 provides many plans to fit the right capability needs and price points for each user in your organization.

Technical support

Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

Financially backed SLA

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service-level agreement.

Simplified IT management

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.

Key use cases

Business-class email

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

Cloud storage

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

Meet online

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

Collaborate, chat privately

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.
