How Credera is different

Connected growth, powered by Omnicom

Marketing ambition and technical execution rarely align on their own, yet growth demands both. As Omnicom's transformation consultancy, we close that gap, turning data and ideas into competitive advantage so your brand can further connect, convert, and endure.

Tech and marketing, working as one

Broken customer experiences don't happen by accident; they begin backstage with disconnected people, processes, and tech. By aligning these from the start, we seal the cracks early, driving operational excellence so every interaction feels effortless and on-brand.

From proof of concept, to proof of value

Digital transformations collapse chasing quick wins or artificial intelligence (AI) pilots that never scale to impact. We help leaders deliver enterprise-ready AI and systems: trusted, governed, and human-centered. Our iterative approach accelerates outcomes while reducing risk and building trust.

Lasting change, built together

Too many transformations implode under complexity, fractured leadership, cost overruns, or ignored front-line input. At Credera, we don't hand over transformation; we co-create it. Together, we move strategy into action and deliver outcomes that land early and last.

Enterprise Data & Analytics Strategy

Service Definition

OUR PERSPECTIVE

- All businesses leverage data daily for various strategic and operational outcomes. Organisations that adopt a holistic, cross-functional data strategy can optimise their operations and reduce the costs associated with using data.
- A well-defined data strategy advances digital transformation, prevents poor decision-making, and protects against regulatory breaches.

PURPOSE & OBJECTIVES

- Our purpose is to enable organisations to harness their data fully by establishing clear data pipelines aligned with key use cases and developing robust data and analytics services that transform data into actionable insights.
- We focus on defining and establishing target data and analytics services that enable the transformation of data into actionable insight, optimising operational models to deliver consistent and repeatable insights.
- Credera guides organisations on how to strategically leverage data across all stages, including ingestion, modelling, analytics, consumption, sharing, and operationalisation, to enhance decision-making and business performance

OUR APPROACH

- Engage business leaders from the start using understandable methods, ensure creative engagement, and communicate the emerging business benefits iteratively. We engage with business verticals to define and pilot data strategies, framing these efforts as organisational transformations and investing in robust change management.
- Our consultants will help organisations quantify the scale of change required by underpinning strategies with detailed current state maturity assessments across critical data capabilities and evaluating organisational complexities and barriers.

OUR CAPABILITIES

- Our data consultants lead the build-out of data strategies, providing a clear target state roadmap, execution guidance, and well-articulated Critical Success Factors (CSFs) & Key Performance Indicators (KPIs) to evaluate success.
- Our data architects deliver roadmaps that provide a clearly communicated vision and plan for Data & Analytics initiatives, articulating the phases and iterations through which these initiatives will align and deliver against business outcomes.

OUR EXPERIENCE

- Credera has been engaged to deliver data strategies across the public sector, insurance, and utilities, assessing clients' overarching data architectures, data governance, and data management practices to determine their capability to utilise data effectively against business strategies. These engagements have included significant transformations where we established whether organisations were positioned to utilise data effectively to deliver against their strategic objectives.

Credera Operational Framework

Our operating framework is designed to uphold the highest standard of excellence across all aspects of our engagements. We ensure superior quality assurance through performance evaluations and integrated client feedback. Our account management processes are built on a deep understanding of our clients' needs, ensuring a personalised service and sustained engagement. Our delivery methodologies are rooted in efficiency and adaptability, utilising our deep experience and best practices to achieve timely and successful outcomes.

We adhere to strict standards and policies to maintain integrity and reliability, whilst our commitment to ecosystem collaboration enhances our ability to leverage diverse insights and expertise across industries.

Central to our approach are our core values: ***Humility, Tenacity, Excellence, Integrity and People First***, which guide our every decision, underscoring our dedication to ethical business practices and client service.

Additional Service Information

PRICING

This service is priced in accordance with the rate card provided and can be modelled using a range of commercial approaches, e.g. time & materials, fixed price, risk/reward and velocity-based, etc. Please refer to our pricing document for more information.
