1 RATE CARD

SynDOC is based on a Software as a Service (SaaS) model, meaning all deployments are evaluated and priced individually. Ongoing licensing costs would be derived based on customer requirements.

1.1 LICENSE FEES

Factors which impact the complexity of the solution (and therefore pricing of the solution) include:

- Volume of expected submissions.
- The technologies in scope (i.e. the use of Machine Learning models).
- Data input method (i.e. manual entry, batch, real-time, National SIRA integration).

Pricing can therefore range from £20,000 to £1,000,000 per annum for a standard build.

1.2 DEPLOYMENT

The solution does not usually incur deployment costs, however for largescale product changes (including the creation of new features or significant alterations to the code base or functionality) and large-scale customers (requesting separate entity), each request will be evaluated, and a pricing proposal will be created.

To obtain full costs please contact Synectics Solutions via:
