SARD Systems:

Consult

January 2026

Typical Price Range

SARD Consult is a system-agnostic workforce analysis platform consisting of three distinct analytical modules. Pricing depends on which modules are required, the number of departments or services involved, and the length of the contract.

The system is licensed on a per-Trust, per-department, or per-service basis depending on the module selected.

Indicative pricing ranges are as follows:

- **Job Planning Diagnostic Assessment Toolkit**
£5,000 to £20,000 per Trust, depending on organisational size, data volume, and scope of analysis.
- **Demand and Capacity Assessment Toolkit**
£500 to £10,000 per department or specialty per annum, depending on service complexity, size and reporting requirements.
- **Utilisation Toolkit**
£500 to £10,000 per service per annum, depending on the scale of utilisation analysis and data inputs required.

These costs relate to system access and use of the analytical modules only.

SARD Consult systems are typically used by SARD as part of a wider **Workforce Optimisation service**, through which diagnostic activity, demand modelling, utilisation analysis and structured outputs are delivered to the Trust. Any consultancy, analysis delivery, training, or workforce optimisation activity undertaken using the system is not included in the prices above and would be scoped and priced separately under SARD Workforce Optimisation.

All pricing including potential discounts are agreed in advance and confirmed prior to contract award.

All prices are quoted excluding VAT.

Included in Price

The SARD Consult licence includes:

- Access to the agreed SARD Consult analytical modules
- System maintenance and routine system updates
- Secure, role-based access for authorised users
- Upload, storage and analysis of workforce and activity data
- Reporting dashboards and export of analytical outputs
- Standard customer and technical support, provided directly by SARD
- Access to system guidance and supporting documentation, including:

- Online help content
- Quick start guides
- Video tutorials

Support is available to all authorised users and is delivered internally by SARD.

Where feature requests fall within the scope of the existing system and demonstrate a clear benefit to multiple customers, they may be included at no additional cost. Where requests fall outside this scope, any potential costs would be discussed and agreed before work is undertaken.

Not Included in the Price

The following are not included within the SARD Consult licence cost:

- Workforce Optimisation services, including diagnostic delivery, demand modelling, utilisation analysis, or production of formal outputs
- Training, engagement, specialist advice or implementation support delivered by SARD specialists
- Bespoke consultancy or service redesign activity
- Additional support beyond standard customer and technical support
- Expansion beyond the licensed number of departments or services

These services, where required, are provided separately under SARD Workforce Optimisation and are scoped and priced according to the Trust's requirements.

Invoicing Process

Typically we invoice on an annual basis across the term of the contract in advance of on-going provision. We are however happy to discuss payment terms prior to implementation.

Multiple Product Purchase

Discounts may be available where SARD Consult is procured alongside other SARD systems. Any such discounts are discussed and agreed on a case-by-case basis.
