

Welcome to Infoshare+

Infoshare+ is a UK data and software company aiming to make local public services seamless and connected with the communities they serve. We believe digital should be a shared environment, supporting consistency, efficiency, and better outcomes for all. With our platform of innovative digital solutions, we're a trusted partner to hundreds of public sector organisations across social housing, local government, and social care.

ClearCore Address Data Matching

Trusted address matching at scale

ClearCore Address Data Matching cleanses, corrects and matches address data against authoritative UK gazetteers to create a trusted, high-quality location foundation. Evidence-based matching, full audit trails and transparent data quality reporting deliver immediate ROI and reliable address data that feeds seamlessly into any system.

Why choose ClearCore Address Data Matching?

Built on definitive UK address data

Matches and validates addresses against AddressBase Premium, Royal Mail PAF (Postcode Address File) and Local Land and Property Gazetteer (LLPG) to deliver trusted, comprehensive coverage.

Delivers immediate value at scale

Automated cleansing and matching process millions of records quickly, reducing effort, cost and data quality risk.

Provides confidence through transparency

Evidence-based matching, full audit trails and data quality reporting ensure results can be trusted and defended.

Features

- Automated data cleaning, matching to address master.
- Matches all addressable locations to master.
- Corrects all elements of addresses
- Applies geocodes (northing / easting or latitude / longitude)
- Built-in clean and matching rules
- Scalable to cleanse millions of records per hour
- Matches based on evidence in records with full audit
- Full data quality statistics published
- Matches to LLPG, OS AddressBase Premium or Royal Mail PAF

Benefits

- Immediate ROI on data cleaning effort
- Outputs can be fed into any application
- Customisable built in rules based on over 25 years of experience
- Process hundreds of millions of records daily
- Compliance with clients' security requirements
- Full transparency for all data from end-end
- Identifies edge cases others have missed
