An Introduction to Our Cloud Support Services

Our accomplished team helps UK-based and global organisations to implement technology change and run more effective technology-enabled businesses. We partner with organisations across different sectors to deliver value from their cloud programmes, providing strategic guidance and executing across strategy, enterprise data management & governance, data architecture, DevOps, data migration, data visualisation, reporting and Artificial Intelligence (AI) implementation.

We work across all major public cloud platforms including AWS, Azure and GCP to accelerate delivery of value for our clients alongside developing and hosting our own solutions. We're independent of specific cloud vendors and are experienced with designing, building and running cross- and multi-cloud solutions.

Our teams hold both architecture and engineering cloud accreditations across AWS, Azure and GCP, offering Cloud Support Services across a range of capabilities, alongside various accreditations in market leading insight generation tools .

In addition, we provide advisory and implementation services around various market-leading cloud software / platform as a service across data infrastructure, data management and data exploitation.

Cloud Data Technology Solutions Services

Overview

At Baringa, we understand that clear data architecture and simplified data systems or technology enables data to be easily found, understood and exploited. We partner with clients to establish the skills and artefacts to support the effective definition and organisation of data. We work with you to build the right design authority to govern data technology architecture, design and build data platforms. We work with you to select, design and build data warehouses, lakes and data pipelines to support data requirements of the organisation. Our expertise spans Artificial Intelligence (AI) implementation, governance and responsible AI practises, supporting our clients to innovate safely and ethically.
