Introduction to our Cloud Support Services

An Introduction to Baringa

Baringa Partners LLP is an award-winning management consultancy specialising in government, energy, financial services, utilities, telecoms and media, and consumer products. It partners with organisations when they are developing and delivering key elements of their business strategy, as well as working extensively with government and regulators providing policy and advisory services.

Baringa is recognised both in the UK and internationally for its unique culture for which it has been awarded a number of accolades.

An Introduction to Our Cloud Support Services

Our accomplished team helps UK-based and global organisations to implement technology change and run more effective technology-enabled businesses. We partner with organisations across different sectors to deliver value from their cloud programmes, providing strategic guidance and executing across strategy, enterprise data management & governance, data architecture, DevOps, data migration, data visualisation, reporting and Artificial Intelligence (AI) implementation.

We work across all major public cloud platforms including AWS, Azure and GCP to accelerate delivery of value for our clients alongside developing and hosting our own solutions. We're independent of specific cloud vendors and are experienced with designing, building and running cross- and multi-cloud solutions.

Our teams hold both architecture and engineering cloud accreditations across AWS, Azure and GCP, offering Cloud Support Services across a range of capabilities, alongside various accreditations in market leading insight generation tools.

In addition, we provide advisory and implementation services around various market-leading cloud software / platform as a service across data infrastructure, data management and data exploitation.

Cloud Setup and Implementation Assurance

Overview

At Baringa, we support our clients' cloud transformation agendas through the provision of end-to-end Portfolio, Programme and Project Management services to successfully implement technology-enabled change across the delivery lifecycle, including cloud setup and implementation. We provide tailored delivery assurance to address our clients' business and cloud delivery challenges.

We embed cyber security, digital risk management, and data privacy controls throughout all stages of cloud setup and implementation, ensuring resilience and compliance. Our approach also leverages AI and automation, with robust cyber safeguards, to further enhance delivery assurance and operational efficiency.

Key Service Features

The key features of our Cloud Setup and Implementation Assurance services include:

- Cloud Transformation Project / Programme initiation and mobilisation
- Delivery assurance for transformation programmes in a Cloud environment
- Support with design and implementation of Cloud-based programmes
- Cloud delivery, resource, quality and risk management
- Programme review and diagnostics assessing Cloud project health
- Controlled Cloud project / programme closure
- Current State and Future State planning
- Cloud Transition Planning
- Third Party Vendor Management
- Client Capability Build
- Change impact assessment and change delivery management
- Integrated planning, scheduling and reporting with dependency management
- Programme teams experienced in diverse Cloud technology engagements
- Experience in PRINCE2, MSP, MoP, Agile for Cloud delivery
- Cloud Test Strategy and Operating Model Design
- Cloud Test Programme mobilisation
- Cloud testing delivery and quality assurance
- Cloud test execution management
- Cloud test accelerators and non-functional testing
- Integration and User Acceptance Testing
- Cyber security and digital risk management embedded in cloud implementation
- Data privacy controls integrated into assurance and testing
- AI-driven delivery management and test automation with safeguards

Potential Service Benefits

The potential benefits of our Cloud Setup and Implementation services include:

- Proven methodologies and tools to execute complex IT/Cloud transformations
- Proven record of successful IT/Cloud transformations
- Control cloud transformation projects to de-risk delivery
- Benefits realisation ensuring project and programme objectives are achieved
- Management of performance, risk, and programme dependencies
- Enhanced collaboration, outcome management and increased programme control
- Identification of cloud programme risks, challenges and opportunities
- Cloud capabilities sustainably developed within the client organisation
- Structured approach for cloud delivery from setup to benefits realization
- Ability to increase change capacity and agility
- Optimised utilisation of test assets
- Improved quality of change to production
- Promote quality assurance through clear governance and controls
- Test process optimisation and automation
- Independent assessment of operational failures and production incidents
- Reduced exposure to cyber and digital risks in cloud delivery
- Improved compliance with data privacy regulations in cloud implementation
- Accelerated adoption of secure, AI-enabled delivery and testing innovations
