2 Service Overview

2.1 Service Description

Sopra Steria's Transition Services support your organization with the management, planning and transition of applications, data and associated services onto cloud-based solutions. Our service covers bespoke and commodity IaaS, PaaS and SaaS solutions and covers transition of both business processes and your workforce to new digital delivery models.

2.2 Features

- ITIL service management expertise provided
- Defining the shape of retained ICT function, skills required
- Design, help establish in-house service integration, management functions
- Supports Target Operating Model (TOM) production
- Transition Strategy/Technology
- Transition Planning, Readiness Assessment, Management and Acceptance into Service (AIS)
- Transition Management, including TUPE, data migration, KT, training and security
- Development of supporting technology, Digital Strategies (e.g. Cloud migration)
- Procurement support, technical schedules, preparing ITTs and bid evaluation
- Change support to change culture and embed new behaviours

2.3 Benefits

- Experienced in supporting complex, multi-supplier service transitions
- Ensuring continuity and efficiency throughout the process
- Ensuring efficiency and alignment with industry standards
- Compatible with SSL's other services for total support package
- Compatible with Agile or Waterfall delivery approaches
- Partnership working and skills transfer to enhance your capability
- Pragmatic application of public sector and ITIL best practice
- Smooth transition to new service provider
- Effective handover and efficient knowledge sharing
- Service available in England, Scotland, Northern Ireland or Wales

2.4 Our Approach

Sopra Steria considers the primary objectives of transition to be safeguarding business continuity, maintaining service levels to users and ensuring minimal disruption. We utilise a tried and tested methodology that has been refined over 45 years adopting PRINCE2, APM and ITIL best practice to ensure all work is planned, implemented, tested, reviewed and managed as effectively as possible. We are able to draw on our specialist in-house expertise in programme and project management, organisational change, HR, security, procurement, technology and finance.

Given that not all solutions and not all customers are the same, we are able to provide implementation, transition and planning solutions across the service and cloud transformation lifecycle, as required, including:

- Setting the vision and strategy

- Identifying the inputs to the design including policy, user needs, constraints, opportunities and organisational readiness
- Developing a roadmap which identifies the sequencing and interdependencies between the different elements and responsibilities across the transformation activity
- Engaging your team to deliver the change
- Working with your team to transfer knowledge to support capability enabling the operational sustainability of the changes implement
- Managing the actual execution of the plan to deliver the outcomes and benefits

We tailor our approach, using the appropriate mix of agile and waterfall or gate-based process to integrate with your governance cycles.

As members of the Institute for Collaborative Working, and certified to the International Standard for Collaborative Working, ISO44001, our approach to Transition is customer first. Our team will work with you to create a mutually agreed Statement of Work (SOW), guided by ISO 44001 principles. The SOW will outline business objectives, establish and agree clear governance models, define management roles and responsibilities, and implement effective risk management strategies, all aimed at fostering seamless collaboration. The content is proportional to the level of complexity of the assignment and is kept to the minimum necessary to be effective and efficient. This joint document ensures objectives effectively communicated and understood at all levels, and quality assurance is integrated into execution and delivery.

2.5 Inputs

The service provided is flexible and the inputs are dependent on the scope of work engaged to perform. Examples of inputs we might expect from you as part of this service include:

- Identified Key Stakeholders and their involvement
- Business Goals, Principles and Drivers
- Access to Business and Technical stakeholders and supporting information
- Prioritisation and Value of requirements
- Service Levels and Availability

This is a high-level list and is not exhaustive. If you cannot provide all of these inputs, then we can discuss altering our approach to accommodate your situation.

2.6 Outputs & Deliverables

The service provided is flexible and the outputs are dependent on the scope of work engaged to perform. Examples of outputs and deliverables generated from the service are identified below:

- Target Operating Model (TOM)
- Requirements Traceability Matrix (RTM)
- Transition Plan and RAID
- Architecture and Design Documentation
- Service Definition and Acceptance Criteria (AIS)
- Deployed Solutions and Operational Documentation

This is a high-level list and is not exhaustive.

2.7 Certifications & Skills

Some of our certifications and skills related to this service are identified below:

- ISO44001 – Collaborative Business Relationship Management Systems
- ITIL v4
- Certified Project Managers (Agile, PRINCE2, APM)

This is a high-level list and is not exhaustive.

3 Pricing

Please refer to the Pricing Document for this Service.

4 Next Steps

4.1 Contact

Please contact us if you would like to know more about any of our listings on G-Cloud.

Email: sector-support@soprasteria.com

As all of our G-Cloud enquiries initially come into a single contact, please remember to tell us:

- Your name, your organisation name and contact details
- Which service you are enquiring about
- A brief summary of your requirements or problem statements that you would like support to address.

4.2 More Information

More information about our services and capabilities can be found on our website [here](#).
