About Sopra Steria Next

Some of our Clients

Sopra Steria Next is the consulting arm of Sopra Steria, a European leader in technology and transformation with over 55,000 employees in 30 countries.

We believe that success comes when you put people first. We help organisations to meet their goals by focussing obsessively on the needs of their customers: to perform better by empowering employees; and to win trust by being responsible corporate citizens.

We're driven by what's next. Technology offers opportunities to address our most important challenges. We enable large, complex organisations to innovate with next generation technology and data-driven insight.

For our clients, we blend business and technology expertise to deliver end-to-end transformation. Our consulting insight accelerates the pace of implementation. That's because our advice draws on the user centered design capability of [CXPartners](#) and is grounded in Sopra Steria's experience of what it takes to run cutting edge services at scale.

In government, financial services, security, and commerce: we re-imagine the organisations that shape everyday life in the UK.

"It was so evident the genuine care you had for this piece of work. You all offer a strong set of skills alongside passion, creativity, relatability and just being super on top of everything! It's been a pleasure working with you all."

Emily Moimoi,
Commissioning
Support Officer,
GambleAware

About Strategic Design

Our Strategic Design practice helps organisations rethink services, products and systems so they work better for the people who rely on them — whether they are citizens, customers, civil servants, colleagues or employees.

We design experiences that create meaningful outcomes for individuals, organisations and society, while helping leaders build cultures that are more human centered, adaptive and ready for the next generation of technology.

And through our specialist consultancy, [CXPartners](#), we bring world class expertise and two decades of deep public sector experience to accelerate meaningful, sustainable change.

We are open to innovative engagement models and – subject to project context – would welcome the opportunity to work with you to identify output or performance based risk/reward mechanisms for aspects of our services.

Digital Accessibility Audit

An objective assessment of accessibility informs your investment in Cloud programmes

Organisations need clear evidence that their digital services are accessible, compliant, and usable for everyone.

We assess existing services against recognised accessibility standards, combining technical audits with testing by people with diverse access needs. This provides a practical, prioritised view of risks and actions needed to improve accessibility and meet regulatory obligations.

Service features

- Evaluate your digital touchpoints and services against WCAG 2.2 standards
- Test digital touchpoints using a range of assistive technologies
- Conduct usability testing with people with diverse access needs
- Analyse technical infrastructure including ARIA tags and hierarchies
- Assessment of AI-enabled, and next-generation components for accessibility, bias, usability risks
- Ensure compliance with best authoring practice per accessibility guidelines
- Deliver a report with audit findings, actions, and recommendations
- Collaboratively create an accessibility development roadmap for your organisation
- Support to implement recommendations and embed accessibility in your organisation
- Support to articulate the importance of accessibility for your organisation.

Service benefits

- Clear, evidence-based view of current accessibility compliance
- Prioritised actions to improve accessibility and usability
- Reduced risk of non-compliance with accessibility regulations
- Alignment with Government and Scottish service standards
- Insight from users with lived experience of access needs
- Better understanding of the benefits an accessibility first approach
- Improved experience for all service users
- Access to accessibility specialists across design and development
- Foundations for accessibility improvements in Discovery, Alpha, or Beta.
