About Sopra Steria Next

Some of our Clients

Sopra Steria Next is the consulting arm of Sopra Steria, a European leader in technology and transformation with over 55,000 employees in 30 countries.

We believe that success comes when you put people first. We help organisations to meet their goals by focussing obsessively on the needs of their customers: to perform better by empowering employees; and to win trust by being responsible corporate citizens.

We're driven by what's next. Technology offers opportunities to address our most important challenges. We enable large, complex organisations to innovate with next generation technology and data-driven insight.

For our clients, we blend business and technology expertise to deliver end-to-end transformation. Our consulting insight accelerates the pace of implementation. That's because our advice draws on the user centered design capability of [CXPartners](#) and is grounded in Sopra Steria's experience of what it takes to run cutting edge services at scale.

In government, financial services, security, and commerce: we re-imagine the organisations that shape everyday life in the UK.

"Sopra Steria not only partnered with us to deliver the technology but also used a human-centric business change approach ensuring those utilising the service were prepared, trained and ready to realise the benefits."

Blaine Pritchard
I-LEAP Programme Manager
Home Office Digital – PPPT

About Business Transformation Consulting

Helping to drive positive change and make public sector services better for our citizens is at the core of everything we do. Whilst technology is a key enabler to making this happen, taking a human-centric approach to transformation delivers far more successful transformation outcomes.

Our Business Transformation consultants at Sopra Steria Next do just that and our human centric approach is more than a theory, it is at the core of how we think, what we do, and how we partner with clients. We build genuine partnerships with organisations, bringing our unique business change, business case and benefits management and target operating model skills and approaches to bear.

We use innovative tools, methodologies and deep experience to help you simplify complexity and drive lasting change.

We are open to innovative engagement models and – subject to project context – would welcome the opportunity to work with you to identify output or performance based risk/reward mechanisms for aspects of our services.

Business Readiness Assessment and Planning

Organisations need to plan and manage their readiness for Cloud adoption

Organisations need to understand their readiness for change to safeguard service continuity and quality.

Without a structured assessment, cut-over risks are missed, employees remain unprepared, and critical initiatives fail.

We provide visibility of strengths and gaps, build workforce confidence, and ensure transformation is implemented without compromising BAU performance or outcomes.

Service features

- Assessment of current organisational processes and performance metrics
- Analysis of existing workflows to identify inefficiencies or risks
- Evaluation of stakeholder readiness and capability for upcoming changes
- Development and administration of a comprehensive readiness assessment, distributed to participants at scale, with analysis of results to inform planning
- Identification of gaps in skills, tools, and resources affecting quality
- Risk and impact assessment related to change initiatives
- Definition of KPIs, assessment criteria to measure readiness/quality outcomes
- Development of actionable recommendations for improvement
- Creation of a roadmap for change adoption and performance optimisation
- Reporting and presentation of findings to leadership for data-driven decision-making.

Service benefits

- Provides clear picture of organisational readiness, reducing uncertainty and risk
- Identifies skill, tool, and resource gaps early, enabling proactive solutions
- Improves process quality and consistency across teams for smoother transitions
- Reveals stakeholder concerns and adoption challenges, supporting engagement strategies
- Highlights workflow inefficiencies, boosting productivity and performance
- Ensures alignment with industry best practices and compliance standards
- Delivers actionable recommendations and a structured roadmap for successful change
- Supports informed decision-making with comprehensive data and insights
- Enhances cross-functional collaboration by creating shared understanding and clear communication channels
- Reduces implementation delays by anticipating obstacles, establishing mitigation strategies upfront.

A Large Public Body

Implementing a standardised solution

A large public body needed to replace its ageing HR and Finance systems and in 2022 selected IBM to implement Oracle Fusion (Cloud modules covering HCM, ERP and EPM) across their estate.

Implementation of a standardised solution aligned to Government best practice required significant changes to ways of working, across a complex user landscape; 38 wider customer organisations in addition to the main client.

And devolved responsibility for processes meant that systems across these organisations were highly customised; giving limited visibility of the size of the challenge.

Sopra Steria helped the client act as an intelligent customer throughout this key corporate transformation programme, supporting the people and process change required to successfully implement the new solution.

We provided holistic oversight and governance across the programme and its workstreams to serve both customers and users effectively.

We were able to surface complex customer, stakeholder and user landscapes and establish a programme-wide change network, including change champions, super users, to enable and reinforce ownership, engagement and cascade necessary information to end users.

Using Sopra Steria and PROSCI methodologies, we delivered a Business Change Strategy and change framework to shape Business change activities within the programme plan.

We undertook change impact assessments to identify and mitigate changes arising from new ways of working; and established a communication and user engagement strategy.

We also provided a Business Readiness Assessment tool for the new solution.

We provided dedicated, impartial, experienced Transformational Change professionals to prioritise client interests and deliver best practice and tools for sustained success.

Our team coached senior leaders to support, champion and embed business change approach throughout the programme and into BAU.

We leveraged our experience gained operating the UK's largest shared service platform (through SSCL - Sopra Steria's joint venture with the Cabinet Office), successfully transforming the programme, moving from a technology led to a people focused approach to support strategic objectives.

The new Oracle system and service wrapper are designed to enable streamlined shared corporate services to be rolled out right across the public sector.
