About Sopra Steria Next

Some of our Clients

Sopra Steria Next is the consulting arm of Sopra Steria, a European leader in technology and transformation with over 55,000 employees in 30 countries.

We believe that success comes when you put people first. We help organisations to meet their goals by focussing obsessively on the needs of their customers: to perform better by empowering employees; and to win trust by being responsible corporate citizens.

We're driven by what's next. Technology offers opportunities to address our most important challenges. We enable large, complex organisations to innovate with next generation technology and data-driven insight.

For our clients, we blend business and technology expertise to deliver end-to-end transformation. Our consulting insight accelerates the pace of implementation. That's because our advice draws on the user centered design capability of [CXPartners](#) and is grounded in Sopra Steria's experience of what it takes to run cutting edge services at scale.

In government, financial services, security, and commerce: we re-imagine the organisations that shape everyday life in the UK.

“Sopra Steria not only partnered with us to deliver the technology but also used a human-centric business change approach ensuring those utilising the service were prepared, trained and ready to realise the benefits.”

Blaine Pritchard
I-LEAP Programme Manager
Home Office Digital – PPPT

About Business Transformation Consulting

Helping to drive positive change and make public sector services better for our citizens is at the core of everything we do. Whilst technology is a key enabler to making this happen, taking a human-centric approach to transformation delivers far more successful transformation outcomes.

Our Business Transformation consultants at Sopra Steria Next do just that and our human centric approach is more than a theory, it is at the core of how we think, what we do, and how we partner with clients. We build genuine partnerships with organisations, bringing our unique business change, business case and benefits management and target operating model skills and approaches to bear.

We use innovative tools, methodologies and deep experience to help you simplify complexity and drive lasting change.

We are open to innovative engagement models and – subject to project context – would welcome the opportunity to work with you to identify output or performance based risk/reward mechanisms for aspects of our services.

Please refer to the Pricing Document for this Service.

Lean Business Process Redesign

Creating efficient processes to maximise the benefit of Cloud investments

Creating efficient, reliable, repeatable business processes underpins any business transformation activity, ensuring technology is fit for purpose.

Business Process Redesign focuses on eliminating waste from current processes, streamlining performance and improving the customer experience, whilst improving the interaction between employees, processes, strategy and technology.
