Overview of Pricing

Insource – data management experts to healthcare

Data Migration – clean data the life blood of any new system

System migrations are a marvellous opportunity to get your data right and improve operational processes. At Insource we not only offer full data cleansing pre-migration, to improve the quality of data held in the new system, but we also ensure complete operational and statutory reporting continuity throughout the migration and the bedding-in process, to give your staff time to get used to new procedures. In addition, we provide a wide range of services from performance analytics, data quality audits, and risk consultancy to new SOP setting and testing, to ensure your new system delivers enhanced business processes you expect.

Our extensive expertise covers legacy migrations for:

PAS/EPR, Digital Pathology, Community, Mental Health and ICS systems.

1.1 Variable Price

Due to the variable nature of Data Migration services for individual customer requirements, we do not provide a standard fee for these services, and therefore these costs are not included within the pricing document. An initial Scoping Exercise will be carried out to obtain information relating to individual customer requirements. Only after the Scoping has taken place can a definitive price be agreed on any variable components. All pricing will be as per the rate card below.
