Bringing your data together

Summary

PAM helps NHS organisations plan, deliver, and assure Cost Improvement Programmes. It integrates local CIP management with national Atamis reporting, enabling transparent benefits tracking, improved governance, and reduced administrative burden.

1. Introduction

PAM (Procurement Activity Manager) is delivered as a secure, cloud-based Software-as-a-Service (SaaS) solution and is charged on a monthly subscription basis.

Licensing is per NHS Trust and modular, enabling organisations to select only the functionality required and scale usage as their Cost Improvement Programme (CIP) evolves.

A free trial period is available prior to purchase.

All prices are exclusive of VAT.

2. Value Statement

PAM provides NHS organisations with a single, governed platform to plan, manage, and deliver Cost Improvement Programmes (CIP).

The platform supports the full CIP lifecycle, including initiative planning, delivery tracking, benefits tracking, financial assurance, and mandated national reporting via Atamis.

PAM improves visibility of savings, strengthens governance, reduces manual reporting effort, and supports evidence-based financial decision-making.

3. Core Module (Required)

PAM Core – Planning & Governance

Description	Price / Month	Price / Year
Tools to plan, manage, and govern Cost Improvement Programmes	£900.00	£10,800.00
