Introduction

Jadu's team of expert developers can build customised widgets, modules and features to suit your needs. Customisations can help you to further leverage the power of the Jadu platform, accommodating simple to complex requests. Additional scoping services may be required to determine your requirements.

Jadu's technical solutions and web development teams can provide service integrations and custom functionality based on your organisation's specific requirements and objectives.

Jadu's approach to custom functionality and service integration design is focused on delivering efficiency and cost savings. Our team has broad experience working with Government and other public sector organisations to develop and deploy solutions that interface with business critical applications, including CRM, financial management, document management, payment service providers, GIS, planning and user authentication systems and services.

We can provide ongoing support for custom software engineering for large custom developments for extra peace of mind.

Services Offered

- Create custom form components for data collection and processing.
- Facilitate integration with external systems, allowing data exchange and synchronization.
- Display dynamic content or data sourced from external APIs.
- Implement SSO solutions to enhance security and user experience.
- Enhance search and navigation capabilities.
- Connect to internal systems to access relevant data for users.
- Add location-based features to enhance user engagement and relevance.
- Add service specific content such as bin collection or events.
- Create new modules for extended functionality specific to your organisation.

Benefits

- Delivery of high-quality solutions by experienced Jadu developers.
- Focus on core business activities while Jadu handles the process.
- Accelerate the introduction of new features and functionalities.
- Collaborative approach ensures requirements and objectives are understood and delivered.
- Rigorous quality assurance standards are maintained throughout the development process.
- Customisations are thoroughly tested and free of defects before deployment.
- Jadu customisations are designed to protect site performance and reliability.
- Customisations are built to remain compatible over time.
- Mitigate in-house development risks such as resource constraints and delays.
- Access end-to-end services for a seamless and hassle-free experience.
- Partnership working helps drive continuous improvement and innovation.

About Jadu

Jadu helps organisations around the world build the best possible connections to their customers and constituents via our low-code, easy-to-use platform, and multi-award-winning design team. At Jadu, as well as building amazing products, we have a team of highly experienced consultants who collaborate with our customers to design and implement innovative and accessible digital services that transform their organisations.

Our Team

Jadu was founded in 2001 by Suraj Kika, who today serves as Group Chief Executive Officer. He was soon joined by our Vice President of Engineering, Andy Perkins and Head of Brand and Filmmaker, Lee Pilmore. Today, we're a distributed team with people and customers all over the world, providing a wide range of innovative products and transformative services.

We were founded with the ambition to 'Provide the tools to organise information across the enterprise and make it accessible to humans and machines' with accessibility sewn into the fabric of everything we do.

Jadu is now on a mission to become the World's most accessible digital platform.

The Way of Jadu

We believe that the tools we make should be beautiful, accessible to the highest quality and loved by the people that use them. Our services are designed to enable our customers and partners to maximise the value of their investment, transform their organisations and deliver innovative, accessible digital services.

We are committed to our people, our culture and our values. "Conduct honest business" is our first directive. It's policy at Jadu to be honest about our business relationships - our customers are our partners, which means transparency and trust.

Jadu is passionate about everything we do and with innovation and creativity at our centre, we love to delight and amaze each other and our customers.

Some of our customers

Jadu is proud to help Local Government and Higher Education organisations all over the world to deliver outstanding digital experiences.

Working in partnership

At Jadu we work in partnership with our customers with a focus on collaboration, co-production and knowledge transfer. Our work is guided by our Prime Directives, which are our core values.

We bring highly skilled teams and agile delivery models, emphasising continuous learning, accessibility and innovation in digital transformation. Wherever possible we blend customer and consultant teams and prioritise upskilling to avoid dependency.

Our approach ensures effective partnerships, sharing best practice and delivering tangible benefits to our customers.

Accreditations

Jadu is accredited with ISO 27001 for information security and has a robust organisation-wide Information Security Management System. The ISO 27001 accreditation is subject to continuous review and a programme of both internal and external audits to ensure on-going compliance.

Jadu also has Cyber Essentials accreditation which is audited annually which includes our hosting service delivery within the defined scope of this certification.

Jadu is also accredited to ISO 9001 in terms of quality management.

We are always looking to improve adherence to other security standards / certifications and as such standards evolve, so please contact us if any of the standards you are looking for are not mentioned in this listing and we will be able to confirm details with you.

Our List of G-Cloud Services

Lot Number	Listing
Lot 2b – Cloud Software	Jadu Digital Platform
Lot 2b – Cloud Software	Jadu Digital Platform Lite
