

DEFENCE IN DEPTH CYBER SECURITY ASSESSMENT

A detailed assessment of your security posture that puts you in control.

Getting to grips with your cyber security posture can be challenging for organisations big and small. From managing alerts to tackling emerging threats and getting the most out of your security tooling – it can be difficult to keep up.

Explore the depths of your security landscape with our Defence in Depth Cyber Security assessment.

We'll conduct a gap analysis, comparing your organisation to our cutting edge Secure by Design blueprints, review your licensing and provide a detailed RAG report complete with prioritisations, justifications, remediation and mitigation actions.

Our experts will illuminate your threat landscape and empower you to take control of your security posture.

OUR SECURITY EXPERTS WILL:

1. ANALYSE

Conduct a gap analysis, comparing your organisation to our Secure by Design blueprints. See how your security stacks up, informed by best practice principles from leading security governing bodies.

2. REVIEW

Carry out a comprehensive review of your Microsoft licensing, to ensure you're getting the most from the tools you have and report any license non-compliance concerns.

3. REPORT

Create a detailed RAG report, exploring all aspects of the assessment with prioritisations, justifications, remediation and mitigation actions and logical groupings of related tasks to keep it simple.

4. ADVICE

We'll present our findings to your stakeholders and walk you through the key takeaways, with expert advice on the steps to improve your security posture.

BY THE END OF THIS ASSESSMENT, YOU WILL HAVE GAINED

 A clear understanding of your security posture, and alignment to our cutting-edge blueprints, informed by best practice principles.

 A prioritised security roadmap and in-depth RAG report exploring the key improvements you can make to strengthen your security posture.

 Licensing clarity - see how well your Microsoft licensing is working for you, any potential cost savings and any license non-compliance concerns.

 Stakeholder alignment - our security experts will host a workshop to run through the findings, roadmap and priorities. You'll have the opportunity to discuss the findings and get your questions answered.
