

MICROSOFT 365 SECURITY ASSESSMENT

Get a crystal-clear view of your Microsoft 365 security posture

Are you confident your Microsoft 365 setup is as secure as it could be? Our Microsoft 365 Security Assessment gives you peace of mind with a structured review of your entire Microsoft 365 estate.

Delivered by expert Cyber Security Consultants, we use advanced tools to benchmark your security against Microsoft's best practices. We dive deep into all the critical areas (Exchange Online, Teams, SharePoint, Endpoint Management, and licensing) to uncover risks and vulnerabilities before they become problems.

We provide a comprehensive evaluation that gives your leadership team a clear, jargon-free understanding of your Microsoft 365 security landscape. You'll get a detailed report that highlights risks, offers prioritised fixes, and provides strategic insights to shape your future security planning and investments. It's a straightforward, transparent process designed to strengthen your organisation's resilience and ensure you're getting the most out of your Microsoft investment.

HOW IT WORKS

1. KICK-OFF & ONBOARDING

We'll start with a kick-off meeting to walk your stakeholders through the process and get our assessment tools connected to your systems.

2. MICROSOFT 365 SECURITY ASSESSMENT

Our team uses specialised tools to retrieve security and licence data from your Microsoft 365 tenant, generating a comprehensive analysis of your setup.

3. SECURE OFFBOARDING

Once the assessment is complete, we remove all our tools and permissions, returning your environment to its original state.

4. KEY FINDINGS PRESENTATION

Our consultant presents the key findings from the report, highlighting vulnerabilities and outlining actionable recommendations to boost your security posture.

WHAT YOU'LL GET OUT OF IT

 **Clear risk visibility.** Gain a detailed understanding of your Microsoft 365 security risks and vulnerabilities, presented in a clear and actionable report for your leadership team.

 **A practical, prioritised list of recommendations** to tackle weaknesses and significantly strengthen your organisation's cyber resilience against threats.

 Ensure your Microsoft 365 environment is in **alignment with relevant regulatory and industry compliance** frameworks, giving you confidence in your security posture.

 Get **valuable strategic insights** to inform your future security planning and investment decisions, ensuring long-term protection and value.
