

Microsoft Dynamics 365 Business Central Implementation Accelerator

You can now have the confidence to achieve your business objectives and still stay within budget. Based on a fixed scope, you are guaranteed a fixed price for your project completion. Our Business Central Implementation Accelerator has a template driven approach, which utilises pre-configurations allowing for a rapid and fixed cost implementation. With significant experience of implementing financial management solutions over the past 30 years, along with a desire to work closely with you, we are able to achieve the setup that best suits your organisation.

Included:

- System setup and configuration
- Static data import
- Opening balance and transaction import
- Super user training
- User acceptance testing support
- Go live support
- Project management

Excluded:

- Integrations with other systems
- Customisations/development

Minimal disruption to your day-to-day business operations

- Increased speed and accuracy of initial setup and data take-on activities
- Overall project timeline reduced when compared to a traditional implementation approach, start realising the benefits of

Business Central sooner

- Transparency in what you can expect to be included and excluded from the project, with clear deliverables
- Provides a platform for future growth, from which you will be able to identify and deliver future ROI
- Fixed budget for the project, giving you security in the fact that the investment is capped and there will be no unforeseen costs
