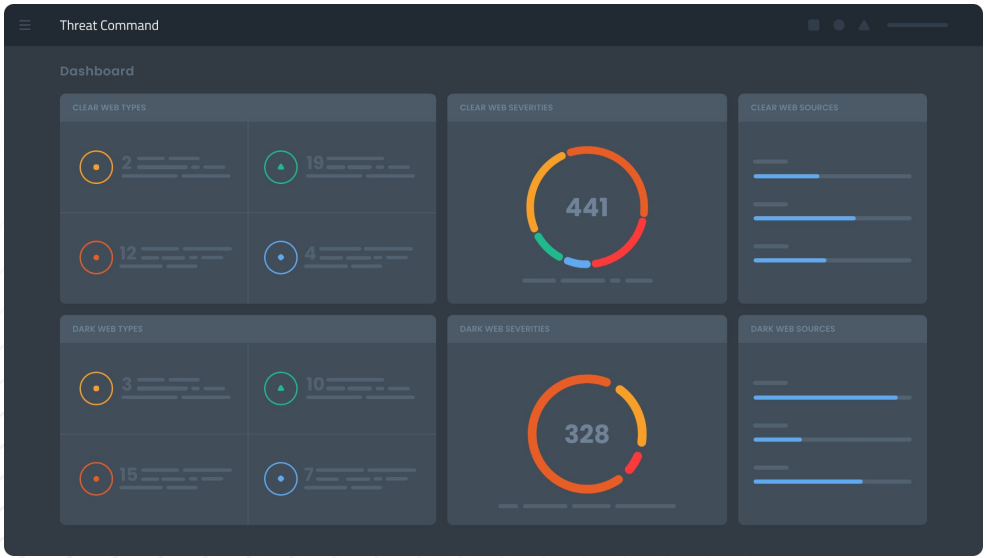
ELIMINATE THREATS

Threat Command

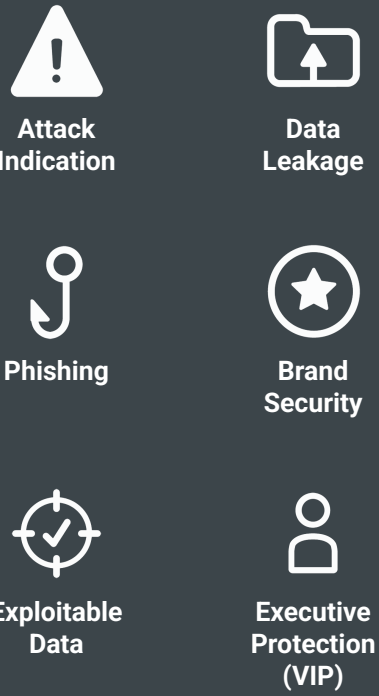
External Threat Intelligence and Remediation



- Get up-to-the-minute protection with our built-in AI/ML technology + expert threat analysts
- Automate instant responses within your security environment
- Utilize our expertise to remediate and speed MTTR
- Simplify workflows with a single, intuitive, cloud-native platform

Single pane of glass for all your threat workflows

- **Entire threat lifecycle**
- **Immediate time to value**
- **Clear, deep and dark web**



Plug and play with existing security devices

Expertise at the click of a button

Unlimited Analyst Access

Single Click Remediation

Average takedown success rates 85%+ in under 24 hrs

- Investigate
- Escalate

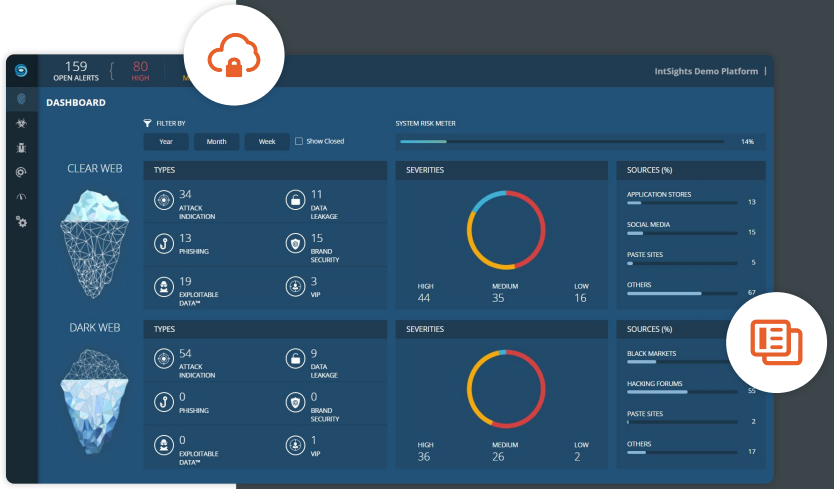
- Remediate

Simplify workflows with a cloud-based platform

Accelerated onboarding

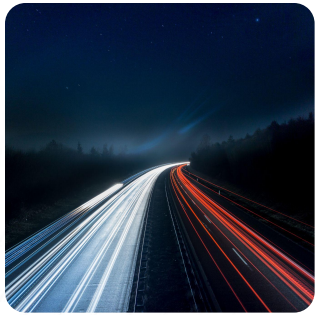
Unlimited users

Multi-tenancy, MSSP ready



Threat Command takes the complexity out of threat intelligence, delivering instant value

Reduce Noise; Prioritize Relevant Threats



Speed Response Across Environment

Expertise On Demand

Simplify Security Workflows

> Threat Command by Rapid7 is a wonderful application because it offers threat intelligence faster than competitive solutions.
>
> — Alex Valentin Lebron Rodriguez, Cyber/Threat Intelligence Analyst, First American Title

Rapid7 Threat Intelligence

Comprehensive intelligence capabilities integrated across the Command Platform to help you detect, prioritize, and mitigate threats faster – inside and out.

Threat Command

Proactively monitors external digital channels to identify and enable mitigation of threats targeting your brand, data, and attack surface, such as phishing sites and data leaks.

Focus:

- External Threat Monitoring
- Brand Protection
- Data Leak Detection
- Attack Surface Visibility

Intelligence Hub

Delivers curated, actionable threat intelligence from Rapid7 Labs, seamlessly integrated into the Command Platform to accelerate response and prioritize risks within IDR workflows.

Focus:

- Integrated workflows
- Curated Threat Intelligence
- Prioritisation
- Actionable context

Managed DRP (MDRP)

Combines DRP technology with dedicated Rapid7 experts who monitor, validate, and provide guidance for faster mitigation of external threats, offloading the operational burden from your team.

Focus:

- Managed Service
- Expert Analysis
- Threat Validation
- Mitigation Guidance

Metasploit Pro

Streamlines penetration testing and vulnerability validation with its extensive exploit database, automated workflows, and comprehensive reporting capabilities.

Focus:

- Penetration Testing
- Vulnerability Validation
- Exploitation Framework
- Security Assessment Automation
