GCLOUD - CELIDOR COMMERCIALS

Version 1.0, 13 March 2022

GCloud - Celidor Service Description

Cloud Security Consultancy

Cloud security architecture and engineering for the implementation and migration of critical systems to public cloud, with demanding security and compliance requirements for protection of personal data, detection and prevention of cyber-attacks and fraud.

Cloud Security Training

Cloud security training delivered by an expert with extensive experience of migrating critical systems to public cloud. Holds architecture, engineering and security certifications across AWS, Azure and GCP. Training can be customised to customer specific requirements based on a standard set of training modules.
