

G-Cloud 15 Lot 2b - LuxisAI Service Overview

Agile Engagement,
Realtime Results.

LuxisAI is Prism Infosec's Cyber Security as a Service (CSaaS) platform, allowing the agile procurement, engagement and live reporting across our portfolio, including offensive and defensive services. It provides immediate access to a comprehensive portfolio of expert cybersecurity services with outcomes delivered at the pace of your business.

What is LuxisAI?

LuxisAI is your portal to Prism Infosec's portfolio of cybersecurity services. It fundamentally changes the way you engage with cybersecurity in your business to make it simpler, faster, and more intuitive to gain the assurance you need, manage your risk, and protect your business at the pace your business requires.

Each one of our services is delivered by our highly-accredited team of experts, with results delivered to you in real time, ensuring your business can react quickly to findings and proactively manage your risk. No more delays waiting weeks for static PDF reports.

Ask us for a demo of LuxisAI today and learn how you and your business can benefit from our platform. Our experts are just a few clicks away.

Features

- Live reporting – see findings as they happen, not after the fact
- Unified interface – everything you need in one secure platform
- Risk quantification – prioritise what matters most with clear visual insight
- Compliance tracking – organised, exportable data to support audits and reporting
- Easy to use – designed for technical and non-technical users

Client benefits

- Immediate access to your testing results via an interactive web portal
- Fast engagement with our services using a self-service project request process
- Fast quote turnaround
- Direct messaging with our expert teams every step of the way
- Interactive reports with dynamic content available any time
- Real experts. Real results. Real time.
