1. Overview

This document is intended to provide a general pricing overview of Nine Software's Foreign Nationals platform. Please treat as "Commercial - In Confidence" not to be shared without prior written consent from The Nine Software Company Ltd (Nine).

Nine have a rich heritage in SaaS products that transform manual processes. Our Foreign Nationals Platform (Also known as OVRO, Foreign Nationals Registrations, or Police Registration Scheme) is a hugely successful product rolled out into 25 of the UK forces including the Metropolitan Police Service, Greater Manchester Police alongside several other notable forces.

The Nine solution allows the efficient registration, processing and then use of the data (or intelligence) gathered, reducing the risk of data not being accessible by those who need it. It enables Forces to efficiently process and use that data by making it readily accessible to those Force users who need to process it and then finally to use and output the data as intelligence through powerful reporting and querying features. It is all achieved via a Front-End which is accessible to the end public users and a secure Back-Office which is only to be used by authorised Force users.

Our application dramatically speeds up the processing of applications, saves time and money and provides a historical accessible record without the need for cabinets of papers and documentation.
