G-Cloud 15 – Cloud Support Services (CSS)
Service Definitions
January 2026

Demystify **Security** Ltd is a UK-based **Cyber Security** consultancy delivering practical, proportionate **Assurance** and advisory services to public sector organisations. We help organisations design, assess and operate secure **Cloud** services aligned to UK government and **NCSC** guidance.

Further information is available at https://www.demystifysecurity.com

Pricing

Please refer to the Demystify **Security** Ltd pricing document for applicable rates. Pricing is based on a fixed daily rate aligned to SFIA levels and the scope of the engagement.

Invoicing Process

Invoices will be submitted monthly in arrears subject to our terms and conditions. Payments can be made by BACS or purchase order. Payment is expected within 30 days or as agreed with CCS framework terms.

Customer Responsibilities

Customers will ensure relevant organisational resources are available, and provide timely access to personnel, documentation, systems and environments required to deliver the service.

Services

Service name	DevSecOps Audit
Service description	Demystify Security Ltd provides independent DevSecOps audits to assess how effectively security is embedded across cloud development and delivery pipelines. Audits

	are aligned to NCSC guidance, Secure by Design principles and industry best practice. We review people, process and technology controls across source code management, CI/CD, infrastructure as code, secrets management, access control, vulnerability management, logging and monitoring. Each audit delivers an evidence-based assessment identifying strengths, weaknesses and risks, with prioritised recommendations to improve secure-by-default delivery, resilience and assurance.

Top features

- Assessment of CI/CD pipelines, tooling and delivery controls
- Review of secure coding, code review and dependency management
- Evaluation of secrets management and access controls
- Vulnerability management and remediation workflow review
- Audit-ready reporting and prioritised recommendations

Business benefits

- Improved security assurance across the software delivery lifecycle
- Reduced risk of vulnerabilities reaching production
- Clear, prioritised improvements for fast remediation
- Better alignment to **Secure by Design** and **NCSC** guidance
- Increased confidence for auditors and senior stakeholders
