G-Cloud 15 – Cloud Support Services (CSS)

Service Definitions

January 2026

Demystify **Security** Ltd is a UK-based **Cyber Security** consultancy delivering practical, proportionate **Assurance** and advisory services to public sector organisations. We help organisations design, assess and operate secure **Cloud** services aligned to UK government and **NCSC** guidance.

Further information is available at <https://www.demystifysecurity.com>

Pricing

Please refer to the Demystify **Security** Ltd pricing document for applicable rates. Pricing is based on a fixed daily rate aligned to SFIA levels and the scope of the engagement.

Invoicing Process

Invoices will be submitted monthly in arrears subject to our terms and conditions. Payments can be made by BACS or purchase order. Payment is expected within 30 days or as agreed with CCS framework terms.

Customer Responsibilities

Customers will ensure relevant organisational resources are available, and provide timely access to personnel, documentation, systems and environments required to deliver the service.

Services

Service name	Secure by Design as a Service
Service description	Demystify Security Ltd provides Secure by Design as a Service to embed security early and continuously throughout cloud service design and delivery. Services align to NCSC

	Secure by Design principles and UK government guidance, including the UK Cabinet Office Secure by Design Framework. We support security requirements definition, threat modelling, architecture review and control selection across cloud solutions, working alongside delivery teams to ensure security is practical and achievable. This service helps customers reduce risk proactively, improve assurance, and deliver secure, resilient cloud services aligned to regulator and stakeholder expectations.
--	---

Top features

- **Security** requirements and control definition for cloud services
- Threat modelling and risk assessment to inform design
- **Security** architecture review and design assurance
- Secure build guidance for delivery teams and suppliers
- **Assurance** artefacts to support governance and audit

Business benefits

- Reduced rework by addressing security early in delivery
- Improved resilience and reduced security risk exposure
- Greater confidence in meeting **NCSC** and government guidance
- Clear, practical guidance for delivery teams
- Better assurance outcomes through evidenced secure design
