Pricing Document

G Cloud 15 Pricing Document

Dated: 27/01/2025

Sigma Carbon Reporting Software

Platform pricing is based on number of **Users** and **Locations**, with options available to add **Single Sign on** and **Power BI Output integration** capability.

Locations:

The number of *Locations* is defined by the granularity of data to be entered. E.g. If whole Organisation level data is being entered, then that is one Location. Whereas, if an Organisation has 100 sites and data is to be entered against all 100, then it would be 100 Locations. Granularity of output reporting will be consistent with the number of Locations.

***Education pricing:** Is available to any Educational Establishment whose main purpose is education and includes Universities, Colleges and Schools.

Core System Includes:

- The core fee includes 1 User and 3 Locations.
- Additional User and Location licenses can be purchased separately.

Core System Annual Fees

Core System Setup Fees (No Historical Data) Includes branded GHG Report Template Setup	£500
--	------

Number of locations	Annual Cost 2 year + contract		Annual Cost 1 year contract	
	Standard Pricing	Education Pricing*	Standard Pricing	Education Pricing*
Base cost up to 3 locations	£1,450	£1,380	£1,450	£1,450
Next 4 -20 each	£190	£180	£190	£180
Next 21 - 50 each	£137	£130	£190	£180
Next 51 to 100 each	£99	£94	£190	£180
Next 100 + each	£63	£60	£190	£180

Options:

Additional User Licenses

The price shown below are for where additional Users and/or Locations, over and above those included within the core system costs above, are required.

User Type	Details	Annual Additional Cost Per User
User	Each unique email address will constitute a "User"	£120

Additional Software Modules

The prices shown below are the same, irrespective of the system size (i.e. point count) and payable annually in addition to the core system costs above.

Module	Details	Annual Additional Cost
Single Sign On	Single Sign-On (SSO) enables users to access the web-based software with their organisation's central authentication credentials, enhancing security and streamlining the login process.	£750
Power BI Output Integration	Power BI Output Integration allows the software to connect directly with your organisation's own Power BI workspace, enabling you to generate linked reports and custom dashboards that provide richer visual insights and streamlined reporting.	£750

Additional Services

For consultancy services not included within the above core fees schedules to facilitate the following services:

System Setup (emission factor and location configuration)

Database setup	Price per Item
Locations Setup	£9
Emission Source Setup Scope 1	£15
Emission Source Setup Scope 2	£15
Emission Source Setup Scope 3	£22

Historical Data Load

POA based on £700 per day

Consultancy for API and Power BI Integration

POA based on £700 per day

Training

The training options below are assumed to be Virtual (delivered via the MS Teams application) or on site at our offices in Milton Keynes. If training is required at your own premises, then an additional fee of £500 will be applicable to cover travel logistics and expenses.

All courses are up to two people.
