

SSL Certificates

SSL Certificates – Overview

Safenames offers SSL (Secure Socket Layer) Certificates also known as “Digital Certificates” from the world’s most trusted data encryption providers.

If you need to secure web sites, e-commerce transactions, intranets, extranets or other network connections, we offers a variety of SSL Certificate authorities and SSL product types at discounted rates to give you a choice to select the SSL Certificate that meets your business needs at a price that fits your budget.

Gain the trust of your customers by letting them know that their data has been secured by a trusted brand. You can also manage all of your SSL Certificates in one place, the Safenames International Domain Portal (IDP). Even if you use multiple SSL Certificate providers, you can register and renew SSL Certificates in a single account.

- All major SSL brands available.
- Certificate issuing within minutes.
- Domain Validated, Company Validated certificates.
- EV (Extended Validation) certificates.
