

Hippo G-Cloud 15 Services

About Hippo

500+
experienced
specialists

Consultants and experts based throughout the UK with experience in Design, Product, Engineering and Delivery.

Combining
design, data and
delivery

Our approach bridges the gap between user-centred design principles and robust engineering, data and cyber practices, allowing our clients to thrive as modern organisations.

Equipped across
Government,
Healthcare and
Private Sectors

We deliver citizen-centric digital services at scale for Government and Healthcare and harness this capability to accelerate the success of customer programmes for the Private sector.

We put people
first

For digital services to be effective they need to be designed for people. We don't lead with technology. Instead we ask how we can solve problems for users from an experience perspective.

Design & Research

Helping our clients understand the problems their users face, design the solution and measure its impact.

- User Research
- Content Design
- UX/UI Design
- Service Design

Hippo core values

Our core values guide the way we operate. They help us make decisions, and keep each other on track.

We believe that if we all act in line with these core values, together we can create a great culture.

At the heart of everything we are human, and we have to balance our ambitious and pragmatic qualities in order to succeed.

Human

Honest, collaborative
and inclusive

Ambitious

Passionate,
value-driven, and bold

Pragmatic

Realistic, adaptive and
focussed

Flexible delivery models

Full Hippo team

Deploying full Hippo multidisciplinary teams and squads, and fully delivering outcomes on behalf of our sponsors.

Part of the team

Adding our people and experience into client teams; providing coaching and mentoring, filling a capability gap, and/or leading teams.

Rainbow team

Collaborating with various different client and vendor teams to deliver as part of a successful 'rainbow team'.

Our technology partner ecosystem

Hippo's teams are multidisciplinary and have broad technical experience across a wide range of platforms.

Our approach is tech agnostic, meaning we can bring the right solutions to the table to solve complex problems.

Microsoft
Partner

Gold Cloud Platform
Silver Security

Social value

Environmental responsibility

Taking action to reduce climate change and protect the natural environment

Sustainable procurement

Supporting the growth of a diverse and resilient supply chain

Social equity

Creating opportunity and growth for all

Diversity, inclusion and belonging

Driving diversity, opportunities and equal reward in the tech sector

Health and wellbeing

Help our people, clients and communities to thrive

Why we're a different kind of partner

Nobody does scale
and pace like us

Broad capability,
deep specialism

We're a local partner
with national impact

We enhance your
skills and maturity

DevOps architecture, deployment and monitoring

DevOps architecture, deployment and monitoring

Our experienced team provide DevOps maturity assessment and implementation across Cloud/multi-Cloud/hybrid Cloud environments.

Our maturity assessment establishes a baseline understanding of existing processes/toolsets in line with Gov/GDS standards.

Our engineers work with client teams to roadmap and mature processes based on agile methodologies, to accelerate service delivery.

Features

- Maturity assessment of existing DevOps processes against Gov/GDS standards.
- Development of infrastructure-as-code, monitoring-as-code (Terraform, Ansible).
- Building and running continuous integration and delivery/deployment pipelines.
- Infrastructure agnostic (Cloud/hybrid/multi-Cloud) including AWS, Azure, Google Cloud platforms.
- Implementation of DevOps monitoring including DevSecOps and observability.
- Advice on best practices for establishing a DevOps culture.
- Access to experienced, AWS and Azure-certified architects.
- Integrated LEAN and Agile delivery.
- Reviews and recommendations about existing organisational processes.
- 24x7 Managed Service provision of your cloud environments and workloads.

Benefits

- Lower risks and more frequent releases.
- Increases delivery velocity.
- Provides better visibility of metrics and cost transparency.
- Increases consistency through Integrated and cloud native tool chains.
- Upskills through knowledge transfer and documentation.
- Automated build/test/delivery pipelines, reducing overhead/increase quality.
