

Hippo G-Cloud 15 Services

About Hippo

500+
experienced
specialists

Consultants and experts based throughout the UK with experience in Design, Product, Engineering and Delivery.

Combining
design, data and
delivery

Our approach bridges the gap between user-centred design principles and robust engineering, data and cyber practices, allowing our clients to thrive as modern organisations.

Equipped across
Government,
Healthcare and
Private Sectors

We deliver citizen-centric digital services at scale for Government and Healthcare and harness this capability to accelerate the success of customer programmes for the Private sector.

We put people
first

For digital services to be effective they need to be designed for people. We don't lead with technology. Instead we ask how we can solve problems for users from an experience perspective.

Our clients

We work with a growing range of public, private and third sector organisations

Our clients

We work with a wide range of public sector organisations:

Ministry
of Justice

Department
for Education

Department
for Work &
Pensions

Department
for Environment
Food & Rural Affairs

Government
Digital Service

Home Office

Government
Property
Agency

Ministry
of Defence

NHS
Business
Services
Authority

Our offices

Our people

Product & Delivery

A user centred agile approach to defining, building and releasing innovative products & services that make a difference.

- Product Managers/Owners
- Delivery Managers/Scrum Mastery
- Business Architects/Analysts

Engineering & Data

Work with your current technology teams to provide a quality solution with ambition and pragmatism.

- Enterprise/Technical Architects
- Software Engineers (Back/Front/Full Stack)
- Test Engineers
- Data Analysts/Engineers
- Data Scientists
- Security Architects

Design & Research

Helping our clients understand the problems their users face, design the solution and measure its impact.

- User Research
- Content Design
- UX/UI Design
- Service Design

Hippo core values

Our core values guide the way we operate. They help us make decisions, and keep each other on track.

We believe that if we all act in line with these core values, together we can create a great culture.

At the heart of everything we are human, and we have to balance our ambitious and pragmatic qualities in order to succeed.

Human

Honest, collaborative
and inclusive

Ambitious

Passionate,
value-driven, and bold

Pragmatic

Realistic, adaptive and
focussed

Flexible delivery models

Full Hippo team

Deploying full Hippo multidisciplinary teams and squads, and fully delivering outcomes on behalf of our sponsors.

Part of the team

Adding our people and experience into client teams; providing coaching and mentoring, filling a capability gap, and/or leading teams.

Rainbow team

Collaborating with various different client and vendor teams to deliver as part of a successful 'rainbow team'.

Our technology partner ecosystem

Hippo's teams are multidisciplinary and have broad technical experience across a wide range of platforms.

Our approach is tech agnostic, meaning we can bring the right solutions to the table to solve complex problems.

Microsoft

Gold Cloud Platform
Silver Security

Social value

Environmental responsibility

Taking action to reduce climate change and protect the natural environment

Sustainable procurement

Supporting the growth of a diverse and resilient supply chain

Social equity

Creating opportunity and growth for all

Diversity, inclusion and belonging

Driving diversity, opportunities and equal reward in the tech sector

Health and wellbeing

Help our people, clients and communities to thrive

Why we're a different kind of partner

Nobody does scale
and pace like us

Broad capability,
deep specialism

We're a local partner
with national impact

We enhance your
skills and maturity

Observability onboarding and monitoring services

Observability onboarding and monitoring

Hippo Digital work with clients to improve system/service observability using industry-leading platforms (Splunk, AWS, Dynatrace, Datadog, New Relic).

Making use of Open Telemetry data (logs, metrics, traces), we aim to improve visibility of user experience, system performance/outputs and DevOps across hybrid/Cloud platforms, increasing security, reducing mean time to detect and accelerating delivery velocity.

Features

- Platform configuration and user onboarding with data custodianship.
- Data collection using open-data standard (Open Telemetry Collector)/agents.
- Full fidelity data ingest of metrics, logs and traces.
- Uses Monitoring-as-Code to automate data collection.
- Quickly determine root cause analysis reducing Mean-Time-to-Repair (MTTR).
- Automate troubleshooting and remediation with AI-driven analytics (AI Ops).
- Infrastructure monitoring for on-prem, hybrid and multi-Cloud platforms.
- Application Performance Monitoring (APM) to pinpoint performance bottlenecks.
- Real User Monitoring (RUM) to capture true user experience.
- Synthetic Monitoring to simulate user transactions, quickly detecting issues.

Benefits

- Provides security cleared (SC)-accredited consultants, analysts and engineers.
- Provides data analytics across cyber security, IOT, and machine learning.
- Reduces 'time to value' through accelerated delivery/onboarding models.
- Improves observability of processes, systems and services.
- User-centred dashboard design provides real-time visibility and insights.
- Uses visualisations of real-time data to empower decision makers.
- Collects and indexes any data using open standards.
- Provides robust framework for use case, incident response, playbook development.
- Automates of alerts/playbooks; faster resolution time (AI Ops).
- Reduces load on platform support team (via Support Model).
