

Hippo G-Cloud 15 Services

About Hippo

500+
experienced
specialists

Consultants and experts based throughout the UK with experience in Design, Product, Engineering and Delivery.

Combining
design, data and
delivery

Our approach bridges the gap between user-centred design principles and robust engineering, data and cyber practices, allowing our clients to thrive as modern organisations.

Equipped across
Government,
Healthcare and
Private Sectors

We deliver citizen-centric digital services at scale for Government and Healthcare and harness this capability to accelerate the success of customer programmes for the Private sector.

We put people
first

For digital services to be effective they need to be designed for people. We don't lead with technology. Instead we ask how we can solve problems for users from an experience perspective.

Design & Research

Helping our clients understand the problems their users face, design the solution and measure its impact.

- User Research
- Content Design
- UX/UI Design
- Service Design

Hippo core values

Our core values guide the way we operate. They help us make decisions, and keep each other on track.

We believe that if we all act in line with these core values, together we can create a great culture.

At the heart of everything we are human, and we have to balance our ambitious and pragmatic qualities in order to succeed.

Human

Honest, collaborative
and inclusive

Ambitious

Passionate,
value-driven, and bold

Pragmatic

Realistic, adaptive and
focussed

Flexible delivery models

Full Hippo team

Deploying full Hippo multidisciplinary teams and squads, and fully delivering outcomes on behalf of our sponsors.

Part of the team

Adding our people and experience into client teams; providing coaching and mentoring, filling a capability gap, and/or leading teams.

Rainbow team

Collaborating with various different client and vendor teams to deliver as part of a successful 'rainbow team'.

Our technology partner ecosystem

Hippo's teams are multidisciplinary and have broad technical experience across a wide range of platforms.

Our approach is tech agnostic, meaning we can bring the right solutions to the table to solve complex problems.

skills and maturity

CIAM Design in a Day

CIAM Design in a Day

This one-day session assesses your organization's CIAM capability, sets a vision for an optimal CIAM solution, and provides a high-level roadmap and potential timeline for CIAM transformation.

The session begins with a rapid review of your current Customer Identity and Access Management capability, ecosystem, architecture, user experience, pain points, and challenges. Following this, we agree on a 'north star' vision for future CIAM capability, focusing on key operating model elements: technology, vendors, user experience, organisation structure, policy, governance, and key delivery roadmap components.

The main deliverable is a high-level options paper to guide future CIAM direction, opportunities, and benefits planning.

Features

- Accelerated one-day workshop assessing current CIAM organisational maturity.
- Deep-dive review of customer journeys and digital user experience.
- Identification of specific CIAM friction points and security gaps.
- Expert evaluation of existing CIAM architecture and ecosystem integration.
- Collaborative definition of a "north star" customer identity vision.
- Guidance on vendor selection and customer-centric technology stacks.
- Assessment of CIAM policy, data privacy, and governance requirements.
- Strategic mapping of high-level CIAM transformation roadmap components.
- Estimation of potential timelines for achieving target CIAM capability.
- Final delivery of a strategic options paper and benefits plan.

Benefits

- Reduces business risk by identifying critical security and access gaps.
- Accelerates strategic decision-making through expert collaboration.
- Lowers long-term costs by defining a clear, efficient roadmap.
- Improves project alignment by establishing a unified "north star" vision.
- Enhances user satisfaction through focused user-centered design assessments.
- Minimises implementation errors by validating architecture and vendor options.
- Streamlines digital transformation by prioritizing high-value IAM roadmap components.
- Simplifies complex governance by defining clear target operating models.
- Increases organisational agility through rapid assessment of current capabilities.
- Provides actionable insights via a professional strategic options paper.
