

Hippo G-Cloud 15 Services

About Hippo

500+
experienced
specialists

Consultants and experts based throughout the UK with experience in Design, Product, Engineering and Delivery.

Combining
design, data and
delivery

Our approach bridges the gap between user-centred design principles and robust engineering, data and cyber practices, allowing our clients to thrive as modern organisations.

Equipped across
Government,
Healthcare and
Private Sectors

We deliver citizen-centric digital services at scale for Government and Healthcare and harness this capability to accelerate the success of customer programmes for the Private sector.

We put people
first

For digital services to be effective they need to be designed for people. We don't lead with technology. Instead we ask how we can solve problems for users from an experience perspective.

Our clients

We work with a growing range of public, private and third sector organisations

Our clients

We work with a wide range of public sector organisations:

Ministry
of Justice

Department
for Education

Department

- Business Architects/Analysts

Engineering & Data

Work with your current technology teams to provide a quality solution with ambition and pragmatism.

- Enterprise/Technical Architects
- Software Engineers (Back/Front/Full Stack)
- Test Engineers
- Data Analysts/Engineers
- Data Scientists
- Security Architects

Design & Research

Helping our clients understand the problems their users face, design the solution and measure its impact.

- User Research
- Content Design
- UX/UI Design
- Service Design

Hippo core values

Our core values guide the way we operate. They help us make decisions, and keep each other on track.

We believe that if we all act in line with these core values, together we can create a great culture.

At the heart of everything we are human, and we have to balance our ambitious and pragmatic qualities in order to succeed.

Human

Honest, collaborative
and inclusive

Ambitious

Passionate,
value-driven, and bold

Pragmatic

Realistic, adaptive and
focussed

Flexible delivery models

Full Hippo team

Deploying full Hippo multidisciplinary teams and squads, and fully delivering outcomes on behalf of our sponsors.

Part of the team

Adding our people and experience into client teams; providing coaching and mentoring, filling a capability gap, and/or leading teams.

Rainbow team

Collaborating with various different client and vendor teams to deliver as part of a successful 'rainbow team'.

Our technology partner ecosystem

Hippo's teams are multidisciplinary and have broad technical experience across a wide range of platforms.

Our approach is tech agnostic, meaning we can bring the right solutions to the table to solve complex problems.

Microsoft

Social value

Environmental responsibility

Taking action to reduce climate change and protect the natural environment

Sustainable procurement

Supporting the growth of a diverse and resilient supply chain

Social equity

Creating opportunity and growth for all

Diversity, inclusion and belonging

Driving diversity, opportunities and equal reward in the tech sector

Health and wellbeing

Help our people, clients and communities to thrive

Why we're a different kind of partner

Nobody does scale
and pace like us

Broad capability,
deep specialism

We're a local partner
with national impact

We enhance your
skills and maturity

Existing IAM Suitability Assessment

Existing IAM Suitability Assessment

Unsure as to whether your current IAM service is sufficient to manage complex and changing Identity and Access Management needs?

This packaged current state assessment project offers a comprehensive evaluation of your existing IDAM deployment, assessing existing architecture and components, highlighting strengths, weaknesses, opportunities and threats, highlighting areas of risk, and focus areas for future IDAM capability development.

Features

- Comprehensive evaluation of current IDAM deployment and service effectiveness.
- Detailed assessment of existing identity architecture and technical components.
- Identification of organisational strengths and inherent service weaknesses.
- Analysis of security vulnerabilities and high-risk access management areas.
- Strategic mapping of opportunities for future IAM capability development.
- Threat modeling to identify risks within the current identity ecosystem.
- Review of current governance, policies, and operational compliance standards.
- Stakeholder engagement to capture functional pain points and requirements.
- Benchmarking current performance against industry best-practice IAM standards.
- Formal report highlighting immediate focus areas for service improvement.

Benefits

- Reduces business risk by identifying critical security and compliance gaps.
- Optimises future investment by highlighting reusable existing IAM components.
- Improves operational efficiency by pinpointing system bottlenecks and friction.
- Enhances security posture through targeted remediation of identified vulnerabilities.
- Facilitates executive buy-in with data-driven evidence of service needs.
- Supports strategic planning by uncovering hidden technical debt.
- Accelerates transformation timelines with a clear, prioritised focus.
- Lowers long-term costs by preventing unnecessary platform replacements.
- Increases organisational agility by aligning IAM with changing needs.
- Strengthens data privacy through rigorous assessment of access controls.
