

Hippo G-Cloud 15 Services

About Hippo

500+
experienced
specialists

Consultants and experts based throughout the UK with experience in Design, Product, Engineering and Delivery.

Combining
design, data and
delivery

Our approach bridges the gap between user-centred design principles and robust engineering, data and cyber practices, allowing our clients to thrive as modern organisations.

Equipped across
Government,
Healthcare and
Private Sectors

We deliver citizen-centric digital services at scale for Government and Healthcare and harness this capability to accelerate the success of customer programmes for the Private sector.

We put people
first

For digital services to be effective they need to be designed for people. We don't lead with technology. Instead we ask how we can solve problems for users from an experience perspective.

Our clients

We work with a growing range of public, private and third sector organisations

Our clients

We work with a wide range of public sector organisations:

Ministry
of Justice

Department
for Education

Hippo core values

Our core values guide the way we operate. They help us make decisions, and keep each other on track.

We believe that if we all act in line with these core values, together we can create a great culture.

At the heart of everything we are human, and we have to balance our ambitious and pragmatic qualities in order to succeed.

Human

Honest, collaborative
and inclusive

Ambitious

Passionate,
value-driven, and bold

Pragmatic

Realistic, adaptive and
focussed

Flexible delivery models

Full Hippo team

Deploying full Hippo multidisciplinary teams and squads, and fully delivering outcomes on behalf of our sponsors.

Part of the team

Adding our people and experience into client teams; providing coaching and mentoring, filling a capability gap, and/or leading teams.

Rainbow team

Collaborating with various different client and vendor teams to deliver as part of a successful 'rainbow team'.

Our technology partner ecosystem

Hippo's teams are multidisciplinary and have broad technical experience across a wide range of platforms.

Our approach is tech agnostic, meaning we can bring the right solutions to the table to solve complex problems.

Digital identity access
management and active
directory migration service

Digital identity ID access management and active directory migration service

Digital identity experts providing end-to-end, UCD and digital identity access management for digital services requiring digital identity, including assurance, authentication, role-based access (RBAC), attributes-based access control (ABAC) identity matching, federation and verification.

We enable federated directory (LDAP) and trusted data attribute exchange services aligning to all digital identity standards and guidelines.

Features

- Develop digital identity strategy and roadmap.
- Understand business risk and ensure appropriate identity levels of assurance.
- Customer/end-user and staff identity strategy and implementation.
- End-to-end design, development and transition of digital identity services based on business and user needs.
- Customised solutions, wraparound service design, implementation of COTS/OTB products.
- Identify/assess complementary services, solutions and products to meet user and business needs.
- GDS Service Standards-compliant, user-centred design (UCD) and evidence-based approach.
- Compliant: GDPR and GOV.UK Good Practice Guide standards 44/45, NIST SP-800-63.
- Meets ISO27001 and ISO9001 standards.
- Support blended supplier/client teams or provide complete teams.
- Cyber Essentials Plus-certified and able to provide SC-cleared people.

Benefits

- Identity verification and multi-factor authentication provides seamless, secure online/telephone business service.
- Protects user personal data against identity theft and fraud.
- Optimises user and customer experience, increasing successful service transactions.
- Reduces licensing costs by ensuring identity 'single-source-of-truth'.
- Lean and Agile working methods release business/user value earlier.
- Improves time to market and lower costs.
- Builds team capability through effective knowledge transfer processes.
- Implements autonomous identity, intelligent access, password authentication, and SSO.
- Implements secure seamless authentication, 2FA/MFA solutions.
