

Riskconnect GRC, Strategy, and Performance (GSP) Secure

GSP Secure is a **public-sector-ready suite of applications for GRC, Strategy and Performance**. Purpose-built to meet stringent security requirements, it helps organisations execute strategy, manage complex programmes, and operationalise GRC frameworks - aligning risk appetite to objectives through a single, trusted platform to improve strategic outcomes.

Service Features

- **Enterprise Risk Management.** Identify, assess, and mitigate enterprise risks
- **Regulatory Compliance.** Centralize compliance tracking and regulatory management
- **Internal Audit.** Optimize audit planning and execution processes
- **Internal Controls.** Automate control testing and monitoring activities
- **Incident Management.** Capture, evaluate and remediate any incident
- **Strategic planning.** Define and implement strategic and operational plans
- **Performance Management.** Monitor KPIs/scorecards to assess strategy and inform decisions
- **PPM.** Tools to help your PMO operate effectively and efficiently
- **Benefits Management.** Track attainment of strategic outcomes not just outputs

Service Benefits

- **Improved Decision Making.** Data-driven insights aligned to business objectives
- **Align Risk with Strategy.** Facilitate a performance-led view of risk
- **Integrated.** One platform, end-to-end GRC, Strategy and PPM capabilities
- **Facilitate Cultural Change.** Operationalise management frameworks, driving real behavioural change
- **Rapid Time to Value** – through efficient and effective onboarding
- **Scalable and Secure.** Built with security engineered into every layer
- **Strong Adoption.** An intuitive design, supporting engagement with all staff
- **Efficiency Gains.** Automated workflows reduce burden and improve collaboration
- **Immediate Visibility.** Single source of truth for risk and performance data
