Riskconnect Active Risk Manager (ARM) Pricing

Our commercial model is based on wanting to help you to embed Active Risk Manager within your Organisation. In this scenario, this is based on a 10-user bundle.

We can provide enhanced services as part of implementation, including, but not limited to additional data migration, configuration of additional processes over and above what is covered in the ARM Essentials implementation and additional training. Fees are project specific and to be confirmed.

Our costs comprise two main elements, an annual license fee and a one-off cost for implementation.

Annual License

	Description	Cost
Core Software license	Includes: • License for 10 users across the organisation • All standard functionality (ARM Desktop, ARM Dashboard, Risk Express and Custom Reporting) • Hosting on our high availability infrastructure within the UK via Amazon Web Services or On-premise • Support for all users All software upgrades and updates to the functionality	£29,184 based on a 10-user bundle.

Optional Add On	Description	Cost
Schedule Risk Analysis	An integration with either Microsoft Project or Primavera P6 to import Project Data into ARM. Access to the Schedule Risk Analysis module within ARM.	£3,264 per year based on a 10-user bundle.
BowTie	Access to the BowTie Module within ARM for cause/effect analysis and identification of control measures.	£3,264 per year based on a 10-user bundle.
Excel Integration	Access to the Excel Integration functionality within ARM.	£3,264 per year based on a 10-user bundle.

Incident Management for user count	Access to the Incident Management module you can record different types of incidents along with the details needed to comply with company procedures and industry regulators.	£3,264 per year based on a 10-user bundle.
API Read	Access to the OData REST API – Read Only. Which allows data to be extracted from ARM into your organisation's data warehouse or a BI Tool.	£3,264 per year based on a 10-user bundle.
API Write	Access to the OData REST API – Write Only, which allows certain data points to be pushed back into the ARM Application. Further details available upon request.	£3,264 per year based on a 10-user bundle.
Doors Integration	An integration with DOORS for Requirements Management.	£3,264 per year based on a 10-user bundle.
Full User	Additional Full Users. Purchased in blocks of 2.	£894 per year
Module per additional full user	Per add-on module, per full user added above the 10 user bundle	£156 per year / per user

Implementation Services

	Description	Cost
ARM Essentials Implementation	The implementation fee covers all activities as part of the implementation process: • Project management including implementation of Active Risk Manager • Technical configuration • UAT support • Training This is a fixed fee – not per day, and not only does this offer good value, it ensures your team will be fully trained, and have a program fit for purpose in place, without incurring additional costs.	£20,000 for the ARM Essentials implementation. Enhanced implementation is available, but the cost varies based on what support is required. Professional Services Rates listed below apply.
Professional Services Rate	Professional Services can be used for the following activities: • Project management including implementation of Active Risk Manager • Technical configuration • UAT support • Training • Upgrades	£1,440 per day £180 per hour

The stated rates exclude Travel and Expenses (T&E). Where travel is required outside of the M25, any associated costs will be charged separately
