

Active Risk Manager

Active Risk Manager (ARM) is Riskconnect's advanced, web-based solution for **Enterprise, Programme, and Project Risk Management**, designed to deliver proactive, integrated, and intelligent risk oversight. ARM empowers organizations to identify, assess, and mitigate risks, ensuring projects stay on track with resilience and global standard Compliance.

Deployment via cloud or on-premise.

Service Features

- **Interactive Dashboards.** Real-time insights with drill-down analytics and reporting.
- **Bowtie Analysis.** Visualize cause-effect relationships for complex risk scenarios.
- **Monte Carlo Simulation.** Predict cost, schedule impacts using probabilistic modelling.
- **Integrated Risk Frameworks.** Supports ISO31000, COSO, Orange MoR compliance.
- **Schedule Risk and Impact Analysis.** Integrates with PrimaveraP6, MSProject seamlessly.
- **Dynamic heat-map** visualization for enterprise-wide risk visibility.
- **API Integration.** Enhanced interoperability with external systems and data sources.
- **Accessibility Enhancements.** Modernized UX with improved accessibility and usability features.
- Aggregates project risks for **holistic enterprise risk oversight**.

Service Benefits

- **Improved Decision-Making.** Real-time insights enable faster, informed choices.
- **Enterprise-Wide Visibility.** Consolidates risks across projects for holistic oversight.
- **Regulatory Compliance.** Aligns with ISO 31000, COSO, and Orange MoR.
- **Enhanced Collaboration.** Shared dashboards foster teamwork and accountability.
- **Cost and Schedule Control.** Monte Carlo predicts project impact accurately.
- **Streamlined Integration.** APIs connect seamlessly with enterprise systems and tools.
- **Accessible User Experience.** Modern interface improves usability and inclusivity.
- **Dynamic Risk Visualization.** Heat maps simplify complex risk relationships.
- **Continuous Improvement.** Advanced analytics drive ongoing process optimization.
