Rimini Protect™

Security Optimization

Proactive security. Immediate insights. Lasting protection.

KEY BENEFITS

- **Accelerated engagement**
  Sessions are designed to quickly deliver value.
- **Industry alignment**
  Ecosystems are benchmarked against NIST CSF 2.0 and leading standards. Guidance on maintaining compliance with applicable standards is also included.
- **Compelling ROI**
  The Health Check includes a robust business case and roadmap for security investments.
- **Extensive coverage**
  Solutions address all major software applications, regardless of vendor support status.
- **Strategic partnership**
  Collaboration between internal teams and Rimini Street experts ensures lasting value.

Rimini Street is the only partner that can support the Japanese market with the high-quality support and protection we need, at a price that aligns with our financial goals."

— Yoshinobu Hamanaka
General Manager,
Corporate IT Management Center
Ricoh Company, Ltd.

Security remains a top priority for every organization, regardless of size, region, industry or mission-critical software operating in the background. Data breaches are increasingly common — threatening business continuity. The average breach now costs organizations more than $4 million, and roughly 1/3 of this cost is due to lost business.[1]

As cyber threats grow more sophisticated in the AI era, leaders must be proactive in their defense, balancing internal resource restraints, progressively complex IT environments, mounting regulatory pressures and lack of security updates for unsupported/outdated software.

Rimini Street offers two exclusive security services for qualified existing clients — specifically security owners. The complimentary Rimini Protect™ Security Quick Check consists of a focused 30-minute advisory session with globally recognized Rimini Street security experts, delivering actionable recommendations to enhance your security posture. For a deeper analysis, the paid Rimini Protect™ Security Health Check entails a comprehensive two-week evaluation, benchmarking your enterprise ecosystem against NIST CSF 2.0 and culminating in a strategic roadmap and business case for security optimization.

Security Quick Check

- 30-minute live advisory session
- Review of enterprise software inventory and security approach
- Actionable recommendations leveraging current solutions and Rimini Protect services
- Summary report with next steps

Security Health Check

- Two-week engagement with Rimini Protect subject matter experts
- NIST CSF 2.0 and industry best practice analysis
- Technical collaboration and stakeholder interviews
- Comprehensive findings, recommendations and strategic roadmap
- Business case for security optimization
- Post-engagement summary and documentation

Rimini Street®

KEY FEATURES

- **Proactive protection to enhance existing security strategies**
  Rimini Protect complements and enhances clients' existing security strategies to protect against known (discovered) and proactively protect against unknown (undiscovered) threats and vulnerabilities.
- **Exclusive differentiation**
  We leverage solutions from leading industry partners that provide technology specifically designed for enterprise software security. Rimini Street has an extensive partner network that includes Trellix, Vali Cyber, RedShield and Waratek, delivering exclusive security benefits to clients combined with our industry-leading enterprise software support services.
- **Purpose-built for enterprise software**
  Rimini Protect is designed and configured to safeguard complex and difficult-to-protect enterprise software and environments and is backed by a global team of more than 75 full-time security professionals.

SUPPORTED PLATFORMS

The Security Quick Check and the Security Health Check are available for a wide range of environments, including:

- SAP
- Oracle
- VMware
- Siebel
- IBM
- WebSphere

The Rimini Street solution

Security Quick Check overview

Qualified existing Rimini Street clients can take advantage of the complimentary Security Quick Check, a focused 30-minute advisory session with Rimini Protect security experts and the client's technical leads, including application security owners, network security owners and technical security teams (all required for the advisory session). This session reviews your current security approach and provides immediate, actionable recommendations to help quickly improve your security posture.

Security Health Check overview

This comprehensive, two-week engagement is a paid assessment, only available for existing clients, that provides an in-depth analysis of your enterprise software ecosystem. Rimini Protect experts benchmark the environment against the NIST Cyber Security Framework 2.0, conduct interviews, review documentation and perform technical evaluations with the lead application and security owners. The result is a detailed report with findings, expert recommendations and a strategic roadmap to optimize the security of your unique ecosystem and includes a robust business case to support security investments.

Immediate impact

- **Risk identification:** The Quick Check highlights areas for rapid improvement, while the Health Check delivers in-depth recommendations and a strategic roadmap.
- **Expert guidance:** Direct access to Rimini Protect engineers ensures best practice recommendations.
- **Tailored roadmaps:** Actionable plans aligned with business and technical objectives are delivered.
- **Enhanced security:** Steps are provided to mitigate risks and strengthen defenses promptly.

Protecting your organization's critical data assets demands proactive assessment, expert insight and a clear roadmap for continuous improvement. With Rimini Street's Security Quick Check and Health Check, you benefit from immediate, actionable recommendations and a strategic plan based on your unique environment. Take the next step toward resilient, compliant and proactive security. Partner with Rimini Protect to assess and improve your enterprise software ecosystem today.
