

Database Health Check

Ensure Your Database Environment is Secure, Scalable and Optimized for Growth

KEY BENEFITS

- › Identify and address recurring performance issues
- › Identify and clean outdated or unused objects and data
- › Improve data availability and access across departments
- › Minimize downtime risk due to unresolved root cause issues, patching or reactive fixes
- › Enhance security posture by identifying vulnerabilities and improving database hygiene
- › Drive scalable growth with a database that evolves with your business
- › Simplify future upgrades and migrations through better structure
- › Understand current state and how to extend the life of your database, as well as better align to data goals (e.g., analytics, AI, reporting)

Optimize Performance. Minimize Risk. Maximize Value.

Your database is foundational to your business. But as databases become increasingly overburdened with growing workloads, expanding data volumes and complex integrations, the risks also increase— from downtime and performance issues to security vulnerabilities and rising costs.

DBAs are left firefighting daily issues, presenting a challenge for CIOs to gain clear visibility into risks and optimization opportunities. Data is often messy, siloed, and difficult to access, slowing down decision-making and innovation.

The Database Health Check from Rimini Street provides a strategic, vendor-agnostic assessment of your current environment. You'll gain expert insights into how well your infrastructure is structured to support your business objectives today, and how to maximize its potential to meet tomorrow's needs.

Comprehensive Assessment

Get a comprehensive report evaluating your database performance, security posture, and cost structure, allowing you to pinpoint inefficiencies and risks that may be slowing you down.

Actionable Recommendations

Receive tailored best practices to optimize configurations, eliminate vulnerabilities, and reduce unnecessary spending, including strategies on cleaning up your database environments and improving data accessibility for downstream teams.

Expert Insights

Access guidance from seasoned professionals with deep industry knowledge and cross-platform expertise. Whether you're struggling with manual processes, messy data structures, or scalability, we will provide you with the insights you need to improve the performance of your databases.

Extend the Value of Your Current Database Footprint

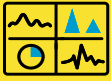

Get more value from your current environment by optimizing configurations, streamlining processes, and improving performance — all without upgrading.

Future-Ready Infrastructure

Ensure your environment can scale to meet evolving business demands with optimal reliability and minimal disruption. We help you be proactive and future ready.

Our Approach

KICKOFF MEETING

Align on goals, milestones, and deliverables

RESEARCH

Stakeholders will complete questionnaires and interviews will take place

REVIEW

A Senior Engineer will partner with you to review database documentation, policies, and processes

ANALYSIS

We will provide and analyze scripts running on databases

RECOMMENDATIONS

We will synthesize all findings, insights, and recommendations.

YOUR PERSONALIZED REPORT INCLUDES:

- › A clear set of recommendations to improve performance, stability, availability and security, grounded in best practices
- › Health metrics with contextual analysis of their business impact
- › A shared understanding of your database's current state in relation to supported business and IT goals
- › Detailed risk and issue analysis with actionable next steps for remediation

What's Included?

Our Database Health Check combines deep domain expertise with diagnostic tooling to deliver a clear, actionable view of your environment.

PERFORMANCE DIAGNOSTICS

Analyze key performance indicators such as response time, memory usage, and throughput to identify and resolve slowdowns and bottlenecks.

DATABASE HYGIENE REVIEW

Identify redundant or outdated processes, evaluate maintenance routines, and receive cleanup recommendations for better manageability and performance.

SECURITY & COMPLIANCE ASSESSMENT

Identify and prioritize focus areas of risk mitigation based on your unique use case. Our experts analyze the security posture of your environment while considering applicable regulatory and compliance needs and challenges.

CUSTOM POLICY & ALERTING RULES

Define and implement alerts based on your internal governance policies, ensuring DBAs and compliance teams are proactively notified of any violations or anomalies.

Ready to uncover what's holding your database back?
