Why Choose PIMSS?	6

PIMSS Compliance allows you to manage statutory and regulatory compliance across the Big Six areas of Compliance risk.

It includes the key workflows you need in each area and a dashboard to provide an “at a glance” summary of compliance performance across all your assets. It also provides a fully auditable, tracking history, giving you 100% confidence that all your properties are safe for your tenants and stakeholders.

PIMSS Compliance also integrates with PIMSS Asset Management to create and maintain the Golden Thread of accurate data to maintain your Single Point of Truth for all your asset data.

Features & Benefits

Features

Why Choose PIMSS?

Five Pillars of Asset Management

We believe effective Asset Management requires five functions, or pillars, to support your organisation delivering on your key tactical and strategic objectives:

- Compliance – managing risk to your stakeholders
- Governance – reporting and evidencing value to your stakeholders & regulators
- Financial Management – optimising your budgets & cashflow
- Efficiencies – reducing your overheads/optimising your resources, delivering value
- Strategic Asset Management – the right data to support your Big Decision making

At PIMSS, our products and services are designed to support the pillars of your asset management function and are under-pinned by our unique position in the market;

We don't make any other software. Our attention is solely on making the best possible Asset Management products. All our focus and development budgets go on that.

Big Decision Software

The Big Decisions are made in Asset Management – our products and services are designed to support you.

We Make It Work

You know your organisation. We know our software and Asset Management.

Working together in partnership, we can provide a range of wrap-around services to complement your in-house resources and expertise and help you optimise the value you derive from your investment in our software.

It's not just about Onboarding, it's about Ongoing.

We have over 25 years' experience, continuously developing our products and helping our clients embed them. We know how expensive and disruptive it can be to change mission critical software – it's one of the reasons we engineered out Silverlight rather than creating a totally new product. Our philosophy is “buy once, buy right”.
