Service description

Goaco offers phishing simulation services in adhoc or managed formats, customizing campaigns to validate technical, people, and process controls. Our simulations test internal awareness and response to phishing attacks, identifying weaknesses and measuring the effectiveness of remediation efforts to enhance overall security posture.

- Securely store captured user credentials if provided during simulations
- Send internally targeted, custom phishing emails to employees
- Analyse results comprehensively using graphical representations and charts
- Display education pages to users after clicking on simulated attacks
- Simulate campaigns with file attachments to test user responses
- Ensure SSL/TLS certificates are valid for secure communication
- Capture credentials through custom landing pages designed for phishing
- Track user interaction statistics to monitor campaign progress accurately

- Provide additional training for staff on phishing awareness
- Conduct real-life phishing exercises to test staff vigilance
- Analyse click statistics to gauge phishing susceptibility
- Capture credentials through simulated phishing attacks
- Implement malware defence measures to protect against malicious emails
- Filter emails to enhance protection against phishing attempts

Our services

UCD User-Centered Design

Our User-Centred Design approach starts by understanding the root problem and what users truly need. Through user research, service design, and clear content, we create journeys that feel natural and accessible. It's not about trends, it's about meaningful outcomes and experiences that genuinely help.

Digital Delivery

As a delivery partner with your organisation, our service is primarily outcomes based, implementing products and services across portfolios & programmes in an iterative manner (Agile & Waterfall) with a focus on the benefits.

Cyber Security

Goaco partner with public & private sector organisations, protecting them from the threat of known and unknown security threats. We help you to develop security maturity, become certified, conduct security/penetration testing and protect from cyber-attacks 24x7.

Data

Goaco's Data Services span the full lifecycle from collection and management to advanced analytics and AI-driven insights. Ensuring accuracy, security, and scalability, we help businesses make smarter decisions, modernise operations, and drive growth.

Cloud

Our service offerings involve transforming your organisation to use the Cloud across Google Cloud, MS Azure and AWS, embedding automation (infrastructure-as-code) for cost-saving, and monitoring and management of your infrastructure for efficiency.

Artificial Intelligence

At Goaco we enable businesses to harness AI to transform how they operate, compete, and grow. Our AI Services span assessment, strategy, design, and implementation covering automation, predictive analytics, generative AI, and custom machine learning solutions.

Managed Services

Goaco's ITIL aligned support team works around the clock to keep your IT running at peak performance levels, using industry leading tools to constantly improve and ensure you are in safe hands.

Software Development

Goaco provide you with tech-agnostic custom, Web, App (mobile) and Low/No code (DynamicsCRM/PowerApps) development from design, build, launch & management. We embed as a development partner providing you the value of leveraging our experience.

Personnel clearance levels (UK)

At a minimum, our UK personnel hold a Government approved BPSS clearance.

Our Penetration Testers and Cyber Security consultants hold a minimum of Security Clearance vetted with the Ministry of Defence (UK Government). For SECRET, personnel with DV Clearance are available, which is the highest level across the UK Government.

International branches are covered by the same principles as BPSS, including identity verification, references and criminal record checks.

This is the value we bring to other regions and countries, with the assurance of personnel accessing sensitive data.
