1. Service Pricing Model

1.1 Verso – Pricing Overview

The **verso Street Works Platform** is delivered as a secure, cloud-based Software as a Service (SaaS) solution, enabling rapid deployment of digital Taxi and Private Hire licensing services for local authorities across England, Scotland and Wales.

The service is priced as:

- a **one-off onboarding and configuration charge**, and
- an **annual service subscription** covering platform access, hosting, support and software assurance.

1.2 Pricing Basis

Annual service pricing is based on the **population size of the local authority**, reflecting service demand, operational complexity and governance requirements.

Pricing bands are defined as:

- **Small authority** – population under 100,000
- **Medium authority** – population 100,000 to 250,000
- **Large authority** – population over 250,000

This approach provides **predictable, transparent** pricing with no per-transaction or per-user charges.

1.3 Annual Subscription Inclusions

The annual service subscription includes:

- Access to the verso Street Works Platform
- Secure UK-hosted cloud infrastructure
- Telephone and email support during UK business hours
- Software maintenance and legislative updates
- Standard platform enhancements released as part of the service
- Security, audit and compliance updates

1.4 Out-of-the-Box Delivery and Customisation

The platform is delivered as a **ready-to-use, out-of-the-box service**, using standard product configuration and pre-defined workflows to support rapid implementation.

A **40-hour customisation pack** is included within the onboarding cost. This allowance may be used for approved configuration activities, including workflow configuration, form setup, reporting configuration and minor enhancements within standard platform capabilities.

Where additional configuration or functionality is required beyond this allowance, further 40-hour customisation packs can be purchased at the applicable rate.

Any additional customisation may impact delivery timescales. The scope, effort and any impact on implementation milestones will be agreed in advance through the formal change control process.

1.5 Verso Taxi Platform Costs
