

# ARO M-Cloud – Virtual Compute (VDI) as a Service

## G-Cloud 15 Lot 2a (ISaaS)

### Pricing

**ARO** Technology.  
Only better.

## Introduction

This pricing relates to ARO M-Cloud, a software-delivered virtual compute service provided as Infrastructure Software as a Service (iSaaS). Prices cover software-defined session delivery, security controls, access management, and platform operations.

### Secure M-Cloud Core Services (Software Platform)

The Secure M-Cloud Core Service provides the software platform and operational capability required to deliver secure, centrally managed virtual compute sessions.

| Included Software Platform Services                                                                                                                                                                                                                                                                                                                                                          | Monthly Cost |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| Management, monitoring, security and governance delivered via the M-Cloud software platform, including: <ul style="list-style-type: none"> <li>• Software-managed firewall policies</li> <li>• Software-integrated directory services</li> <li>• Software-enforced multi-factor authentication</li> <li>• Platform-level backup services</li> <li>• Managed shared user workspace</li> </ul> | £1,296.00    |

### Optional Core Extras & Support (Software-Delivered)

| Optional Service                           | Unit         | Cost      |
|--------------------------------------------|--------------|-----------|
| Site-to-site VPN (software-defined)        | Monthly      | £28.00    |
| URL Web Filtering (software policy)        | User / Month | £3.60     |
| Bespoke Reporting (software-generated)     | User / Month | £2.16     |
| Cloud Support – Network / Systems Engineer | Per Day      | £1,224.00 |
| Cloud Support – Senior Engineer            | Per Day      | £1,440.00 |
| Cloud Support – Technical Architect        | Per Day      | £1,872.00 |

## Virtual Compute Concurrent User Pricing

| Virtual Compute Profile                            | Unit         | Cost   |
|----------------------------------------------------|--------------|--------|
| M-Cloud-4 (2 vCPU, 4GB RAM, 50GB user workspace)   | User / Month | £54.72 |
| M-Cloud-8 (2 vCPU, 8GB RAM, 50GB user workspace)   | User / Month | £64.80 |
| M-Cloud-16 (8 vCPU, 16GB RAM, 50GB user workspace) | User / Month | £79.20 |

Higher-performance virtual compute profiles are available on request. Profiles define software-allocated compute resources used to deliver virtual compute sessions and do not represent customer-managed infrastructure.

## Additional Software-Delivered Services

| Additional Service                                  | Unit          | Cost   |
|-----------------------------------------------------|---------------|--------|
| M-Cloud User Support                                | User / Month  | £4.32  |
| Multi-Factor Authentication Services                | User / Month  | £7.49  |
| Additional User Workspace Storage (100GB increment) | 100GB / Month | £17.28 |

All services listed are delivered as part of the M-Cloud software service. Charges relate to software-defined capability and platform operation only and do not represent the supply of compute hosts, storage hardware, or network infrastructure.
